 - (a) be made on the recommendation of the Minister responsible for the administration of this Act; and
 - (b) appoint a date that is 1 January in a year; and
 - (c) be made at least 1 year before the date appointed in the Order in Council; and
 - (d) not appoint a date earlier than 1 January 2013.
- (2) One or more Orders in Council made under section 2A(8) or (9) may provide that subpart 2 or 4 of Part 5 of Schedule 3 applies—
 - (a) specifically to 1 or more classes of persons who carry out an activity listed in subpart 2 or 4 of Part 5 of Schedule 3 on and after a date appointed in the order; or
 - (b) generally to all persons who carry out an activity listed in subpart 2 or 4 of Part 5 of Schedule 3 on and after a date appointed in the order.
- (3) Before recommending that an Order in Council be made under section 2A(8) or (9), the Minister must have regard to—
 - (a) the need for the EPA to be able to verify information contained in emissions returns of the persons who will become participants in respect of an activity listed in subpart 2 or 4 of Part 5 of Schedule 3 by operation of the order; and

- (b) the likelihood that, as a result of becoming participants by operation of the order, persons carrying out an activity listed in subpart 2 or 4 of Part 5 of Schedule 3 will reduce their emissions; and
- (c) the desirability of minimising—
 - (i) the compliance and administration costs of persons who will become participants in respect of an activity listed in subpart 2 or 4 of Part 5 of Schedule 3 by operation of the order; and
 - (ii) the administration costs of the Crown in administering the greenhouse gas emissions trading scheme established under this Act.
- (4) Before recommending the making of an Order in Council under section 2A(8) or (9), the Minister must consult, or be satisfied that the chief executive has consulted, persons (or their representatives) that appear to the Minister or the chief executive likely to have an interest in the order.

2C Effect of Orders in Council in relation to Part 5 of Schedule 3

- (1) This section applies if an Order in Council made under section 2A(8) or (9) has the effect that subparts 1 and 2 of Part 5 of Schedule 3, or subparts 3 and 4 of Part 5 of Schedule 3, apply at the same time.
- (2) If this section applies, then regulations made under section 163(1) may require—
 - (a) a person carrying out an activity listed in subpart 1 of Part 5 of Schedule 3 and a person carrying out an activity listed in subpart 2 of Part 5 of Schedule 3 to—
 - (i) collect data or other information relating to the same synthetic fertiliser; and
 - (ii) calculate emissions in respect of emissions relating to the same synthetic fertiliser; or
 - (b) a person carrying out an activity listed in subpart 3 of Part 5 of Schedule 3 and a person carrying out an activity listed in subpart 4 of Part 5 of Schedule 3 to—
 - (i) collect data or other information relating to the same ruminant animals, pigs, horses, or poultry; and
 - (ii) calculate emissions relating to the same ruminant animals, pigs, horses, or poultry.
- (3) However,—
 - (a) on and after the date from which the person carrying out an activity listed in subpart 2 of Part 5 of Schedule 3 is required to surrender units

- for emissions relating to the fertiliser, this Act no longer applies to the person carrying out the activity listed in subpart 1 of Part 5 of Schedule 3 in relation to the fertiliser; and
- (b) on and after the date from which the person carrying out an activity listed in subpart 4 of Part 5 of Schedule 3 is required to surrender units for emissions relating to the ruminant animals, pigs, horses, or poultry, this Act no longer applies to the person carrying out the activity listed in subpart 3 of Part 5 of Schedule 3 in relation to those ruminant animals, pigs, horses, or poultry.
- (4) If an Order in Council is made under—
- (a) section 2A(8) that has the effect of applying subpart 2 of Part 5 of Schedule 3 to all persons who carry out an activity listed in that subpart from a date appointed in that order, then section 2A(5) and subpart 1 of Part 5 of Schedule 3 expire and are repealed on the date from which all persons carrying out an activity listed in subpart 2 of Part 5 of Schedule 3 are liable to surrender units in respect of emissions from the activity;
 - (b) section 2A(9) that has the effect of applying subpart 4 of Part 5 of Schedule 3 to all persons who carry out an activity listed in that subpart from a date appointed in that order, then section 2A(6) and subpart 3 of Part 5 of Schedule 3 expire and are repealed on the date from which all persons carrying out an activity listed in subpart 4 of Part 5 of Schedule 3 are liable to surrender units in respect of emissions from the activity.
- (5) If, by operation of subsection (3)(a) or (b) or (4)(a) or (b), this Act no longer applies to a person carrying out an activity in subpart 1 or 3 of Part 5 of Schedule 3, or an activity listed in subpart 1 or 3 of Part 5 of Schedule 3 is repealed, then—
- (a) section 54(4) applies, with any necessary modifications, to any person who has ceased, by operation of the provision, to be a participant in respect of that activity; and
 - (b) the person is not required to comply with section 59, but the EPA may, for the purposes of section 59(2), determine that the person has ceased to carry out the activity.

Section 2C: inserted, on 8 December 2009, by section 5 of the Climate Change Response (Moderated Emissions Trading) Amendment Act 2009 (2009 No 57).

Section 2C(5)(b): amended, on 5 December 2011, by section 19 of the Climate Change Response Amendment Act 2011 (2011 No 15).

 - (a) the form in which an application must be made; and
 - (b) the final date by which applications for an allocation of New Zealand units under the allocation plan must be received by the Minister (which must, in the case of a pre-1990 forest land allocation plan, be no earlier than 40 working days after the date on which the notice is given and, in the case of a fishing allocation plan, be no earlier than 20 working days after the date on which the notice is given); and

- (c) the data and other information, or the kind of data and other information, that must accompany the application in order for the person's application to be considered (which must be the data and other information specified in the allocation plan); and
 - (d) how the data and other information are to be supplied.
- (3) To avoid doubt, data and information supplied under subsection (2) are subject to the Official Information Act 1982.
- (4) Despite anything in this subpart or in any allocation plan,—
 - (a) a person is not entitled to receive an allocation of New Zealand units under an allocation plan unless the person applies to the Minister for an allocation under the allocation plan and supplies the required data and other information in the required format; and
 - (b) the Minister is not required to make a determination in respect of an application for an allocation if the application is received after the date specified in the notice under subsection (2)(b).
- (5) The Minister must, in relation to each application received by the date specified in the notice given under subsection (1), make a preliminary determination in accordance with the allocation plan as to—
 - (a) whether the person is eligible to receive an allocation of New Zealand units under the plan; and
 - (b) the total number of New Zealand units the person is entitled to receive under the plan (which may be expressed by reference to a formula); and
 - (c) the year or years in which the New Zealand units will be transferred to the person.
- (6) After making a preliminary determination, the Minister must notify the applicant of the following:
 - (a) whether, in the Minister's opinion, the person is an eligible person under the allocation plan, and—
 - (i) if so, the total number of New Zealand units the Minister has determined the person is entitled to receive under the plan (which may be expressed by reference to a formula) and the year or years in which those units will be transferred; and
 - (ii) if not, the reasons for that opinion; and
 - (b) that, if the applicant believes there are any errors or miscalculations in the Minister's preliminary determination of eligibility or entitlement, the person may provide further information to the Minister supporting a different determination; and
 - (c) the final date by which any further information must be received by the Minister (which must, in the case of a pre-1990 forest land allocation plan, be no earlier than 20 working days after the date on which the no-

tice is given, and in the case of a fishing allocation plan, be no earlier than 10 working days after the date on which the notice is given).

- (7) Following the expiry of the date referred to in subsection (6)(c), the Minister must, taking into account any information received by the due date in response to the notice, make a final determination of the matters specified in subsection (5).
- (8) As soon as practicable after making a final determination under subsection (7), the Minister must—
 - (a) notify the applicant of the determination; and
 - (b) publish the determination in the *Gazette*; and
 - (c) ensure that the determination is accessible via the Internet site of the EPA; and
 - (d) if New Zealand units are allocated to an applicant, direct the Registrar to transfer the allocated New Zealand units to the applicant's holding account in the amounts and on the date or dates specified in the determination.
- (8A) Despite subsection (8)(d), if the applicant does not have a holding account, the Registrar is not required to comply with a direction by the Minister until the applicant has opened a holding account that has been approved by the Registrar.
- (9) For the purposes of making a preliminary determination under subsection (5) or a final determination under subsection (7) in respect of a fishing allocation plan, the Minister may access, and rely on, the information set out in the quota register kept under Part 8 of the Fisheries Act 1996.
- (10) To avoid doubt, and without limiting the powers conferred under sections 94 to 106, the EPA or any other person with powers under sections 94 to 106 may exercise those powers for the purposes of ascertaining whether a person who applies for an allocation of New Zealand units or is allocated New Zealand units under an allocation plan is complying with, or has complied with,—
 - (a) any requirement in this section or section 78 or 79; or
 - (b) any requirement in the relevant allocation plan (for example, a requirement to keep records).

78 Power to revoke and replace determinations

- (1) Despite anything in section 77(7) or (8), the Minister may (but is not required to) reconsider, revoke, and replace a determination made under section 77(7) with a new determination if—
 - (a) the allocation plan under which the determination was made is amended; or
 - (b) in the Minister's opinion, the determination has resulted, or would otherwise result, in a person receiving an incorrect allocation because—
 - (i) of an error in the application of the criteria specified in the applicable allocation plan; or
 - (ii) a person has provided altered, false, incomplete, or misleading information in response to a notice given under section 77(1) or (6) or 86E.
- (2) Before revoking and replacing a determination that would affect the number of units allocated to a person, the Minister must—
 - (a) make a preliminary determination of the matters specified in section 77(5); and
 - (b) give notice to the person of—
 - (i) the ground specified in subsection (1) and any information that led the Minister to reconsider the person's allocation under the relevant allocation plan; and
 - (ii) the Minister's preliminary determination made under paragraph (a); and
 - (c) follow the procedure in section 77(6) to (8), which apply, with any necessary modifications, to the new determination.
- (3) The Minister may not revoke or replace a determination under this section after the expiry of 4 years from the date of notification of the Minister's first determination under section 77(7) if the new determination would decrease the number of units allocated to a person.
- (4) Despite subsection (3), if the Minister is satisfied that an application for an allocation under an allocation plan, or any other document submitted in respect of the application, was submitted with the intention to deceive, then the Minister may revoke and replace any determination that resulted from the application at any time so as to decrease the number of units allocated to the applicant (including decreasing that number to zero).
- (5) Subsections (6) and (7) apply if—
 - (a) the Minister has made a determination under section 77 that Te Ohu Kai Moana Trustee Limited is entitled to receive New Zealand units under a fishing allocation plan; and

- (b) New Zealand units have been transferred to Te Ohu Kai Moana Trustee Limited under the determination in respect of unallocated quota; and
 - (c) Te Ohu Kai Moana Trustee Limited has allocated and transferred unallocated quota together with New Zealand units associated with that quota to any iwi or mandated iwi organisation in accordance with section 138A(2) of the Maori Fisheries Act 2004; and
 - (d) the Minister reconsiders the determination.
- (6) In reconsidering the determination of Te Ohu Kai Moana Trustee Limited's entitlement, the Minister must treat an iwi or a mandated iwi organisation which has received unallocated quota from Te Ohu Kai Moana Trustee Limited as if it owned that quota on 24 September 2009.
- (7) If the Minister decides that the determination of Te Ohu Kai Moana Trustee Limited's entitlement to New Zealand units should be revoked, the Minister must make a new determination of—
- (a) Te Ohu Kai Moana Trustee Limited's entitlement to be allocated New Zealand units under the fishing allocation plan as if the unallocated quota that Te Ohu Kai Moana Trustee Limited owns on the date of the new determination were all the unallocated quota it owned on 24 September 2009; and
 - (b) the entitlement of an iwi or a mandated iwi organisation that has received unallocated quota to be allocated New Zealand units under the fishing allocation plan as if that iwi or mandated iwi organisation owned the unallocated quota it received on 24 September 2009.
- (8) In subsections (5) to (7) and section 79(4),—
- iwi** has the same meaning as in section 5 of the Maori Fisheries Act 2004
- mandated iwi organisation** has the same meaning as in section 5 of the Maori Fisheries Act 2004
- unallocated quota** means quota held by Te Ohu Kai Moana Trustee Limited on 24 September 2009 and that had not been allocated under section 130(1), 135, or 151 of the Maori Fisheries Act 2004 at that date.

Section 78: substituted, on 8 December 2009, by section 32 of the Climate Change Response (Moderated Emissions Trading) Amendment Act 2009 (2009 No 57).

79 Effect of new determination

- (1) If the Minister makes a new determination in accordance with section 78, then—
- (a) the new determination applies and replaces the earlier determination from the date the new determination is made; and
 - (b) the Minister—
 - (i) may, if practicable, amend or revoke any direction given under section 77(8)(d); or

- (ii) must otherwise give any new direction necessary under section 77(8)(d) in order to give effect to the new determination.
- (2) Subject to subsection (3), a new determination does not change or otherwise affect any transfer of New Zealand units made to a person in accordance with a revoked determination before the date the new determination came into effect.
- (3) If New Zealand units have been transferred to a person under an earlier determination and the person would not be entitled under the new determination to those New Zealand units (including where the result of the new determination is that the person would not be entitled to any New Zealand units under the allocation plan), then—
 - (a) the notice of the new determination given to the person under section 77(8) must specify—
 - (i) the number of units required to be repaid; and
 - (ii) the Crown holding account into which they must be transferred; and
 - (b) the person must, within 60 working days of the date of the notice, repay those units by transferring the specified number of units to a Crown holding account in accordance with the notice, and sections 134 and 135 apply, with any necessary modifications, as if—
 - (i) the units the person is required to repay were units transferred to the person in error; and
 - (ii) the requirement to repay the units arose under section 125.
- (4) This section applies to any new determination made in accordance with section 78(7) as if—
 - (a) only the New Zealand units associated with the unallocated quota held by Te Ohu Kai Moana Trustee Limited at the date of the new determination had been transferred to it under the earlier determination; and
 - (b) the New Zealand units associated with the unallocated quota transferred to an iwi or a mandated iwi organisation by Te Ohu Kai Moana Trustee Limited had been transferred to the iwi or mandated iwi organisation under the earlier determination.

Allocation of New Zealand units in relation to industry and agriculture

Heading: inserted, on 8 December 2009, by section 32 of the Climate Change Response (Moderated Emissions Trading) Amendment Act 2009 (2009 No 57).

80 Criteria for allocation of New Zealand units to industry

- (1) A person is eligible for an allocation of New Zealand units for an eligible industrial activity in respect of a year if the person carries out the activity at any time in a year.
- (2) Subsection (1) is subject to sections 86E and 161D(7).

Section 80: substituted, on 8 December 2009, by section 32 of the Climate Change Response (Moderated Emissions Trading) Amendment Act 2009 (2009 No 57).

81 Entitlement to provisional allocation for eligible industrial activities

Subject to section 82, an eligible person is entitled to a provisional allocation of New Zealand units for an eligible industrial activity in respect of a year calculated in accordance with the following formula:

$$PA = LA \times \sum(PDCT \times AB)$$

where—

PA is the person's provisional allocation entitlement for the eligible industrial activity for the year

LA is the level of assistance for the eligible industrial activity for the year, being,—

- (a) for a moderately emissions-intensive eligible industrial activity,—
 - (i) 0.6 in 2010, 2011, and 2012; and
 - (ii) in each year after 2012, the level of assistance from the previous year less 0.01 (the phase-out rate for a moderately emissions-intensive eligible industrial activity):
- (b) for a highly emissions-intensive eligible industrial activity,—
 - (i) 0.9 in 2010, 2011, and 2012; and
 - (ii) in each year after 2012, the level of assistance from the previous year less 0.01 (the phase-out rate for a highly emissions-intensive eligible industrial activity)

\sum is the symbol for summation (of each $PDCT \times AB$ calculation)

PDCT is the amount of each prescribed product from the eligible industrial activity produced by the person in the year immediately preceding the year to which the provisional allocation relates, as determined, if relevant, in accordance with regulations made under this Act

AB is the prescribed allocative baseline for the applicable product that is required to be used by the eligible person by regulations made under this Act.

Section 81: substituted, on 8 December 2009, by section 32 of the Climate Change Response (Moderated Emissions Trading) Amendment Act 2009 (2009 No 57).

Section 81 formula item LA paragraph (a)(ii): replaced, on 1 January 2013, by section 31(1) of the Climate Change Response (Emissions Trading and Other Matters) Amendment Act 2012 (2012 No 89).

82 Entitlement to allocation for eligible industrial activities where provisional allocation not received

- (1) An eligible person who carries out an eligible industrial activity at any time in a year, but did not carry out that activity during the immediately preceding year (a **new entrant**) is not entitled to a provisional allocation calculated under section 81, but is entitled to an allocation under subsection (2).
- (2) A new entrant or other eligible person who did not receive a provisional allocation of New Zealand units for an eligible industrial activity in respect of a year is entitled to an allocation of New Zealand units for the eligible industrial activity for the year calculated in accordance with the formula in section 83(2).

Section 82: substituted, on 8 December 2009, by section 32 of the Climate Change Response (Moderated Emissions Trading) Amendment Act 2009 (2009 No 57).

83 Annual allocation adjustment

- (1) A person who has received a provisional allocation of New Zealand units for an eligible industrial activity in respect of a year must, subject to section 84, calculate the person's annual allocation adjustment for the activity for the year by—
 - (a) determining the person's final allocation entitlement for the eligible industrial activity in respect of the year in accordance with the formula in subsection (2); and
 - (b) then determining the annual allocation adjustment in accordance with the formula in subsection (3).
- (2) The formula for the calculation of a person's final allocation entitlement is as follows:

$$FA = LA \times \sum(PDCT \times AB)$$

where—

FA is the person's final allocation entitlement for the eligible industrial activity for the year

LA is the level of assistance for the activity for the year, being,—

- (a) for a moderately emissions-intensive eligible industrial activity,—
 - (i) 0.6 in 2010, 2011, and 2012; and
 - (ii) in each year after 2012, the level of assistance from the previous year less 0.01 (the phase-out rate for a moderately emissions-intensive eligible industrial activity):
- (b) for a highly emissions-intensive eligible industrial activity,—
 - (i) 0.9 in 2010, 2011, and 2012; and

- (ii) in each year after 2012, the level of assistance from the previous year less 0.01 (the phase-out rate for a highly emissions-intensive eligible industrial activity)

Σ is the symbol for summation (of each $\text{PDCT} \times \text{AB}$ calculation)

PDCT is the amount of each prescribed product from the eligible industrial activity produced by the person in the year, as determined, if relevant, in accordance with regulations made under this Act

AB is the prescribed allocative baseline for the applicable product that is required to be used by the eligible person by regulations made under this Act.

- (3) The formula for the calculation of a person's annual allocation adjustment is as follows:

$$\text{AA} = \text{PA} - \text{FA}$$

where—

AA is the person's annual allocation adjustment of units for the eligible industrial activity for the year

PA is the person's provisional allocation for the eligible industrial activity notified by the EPA under section 86B

FA is the person's final allocation entitlement for the eligible industrial activity for the year calculated under subsection (2).

- (4) If the figure for AA calculated under the formula in subsection (3)—
 - (a) is a negative number, then the person is entitled to be allocated the number of units in the annual allocation adjustment:
 - (b) is a positive number, then the person is liable to repay the number of units in the annual allocation adjustment.
- (5) If an eligible person is entitled to be allocated the number of units in an annual allocation adjustment and the person—
 - (a) makes an application for a provisional allocation for the same eligible industrial activity in the year following the year to which the annual allocation adjustment relates, then the person must record the adjustment in the person's application for a provisional allocation for the following year:
 - (b) does not make an application for a provisional allocation for the same eligible industrial activity in the year following the year to which the annual allocation adjustment relates, the person may make a separate application under section 86 for an allocation of the number of units in the annual allocation adjustment.
- (6) If an eligible person is liable to repay the number of units in an annual allocation adjustment and the person—

- (a) makes an application for a provisional allocation for the same eligible industrial activity in the year following the year to which the annual allocation adjustment relates, then—
 - (i) the person must record the adjustment for the year in the person's application for a provisional allocation for the following year; and
 - (ii) subject to section 86B, the EPA must deduct the number of units in the adjustment from the provisional allocation for the following year, unless the number of units in the provisional allocation is less than the adjustment, in which case the person must, within 20 working days of being notified of the shortfall in the number of units by the EPA, repay the shortfall by transferring the relevant number of units to a Crown holding account designated by the EPA; or
 - (b) does not make an application for a provisional allocation for the same eligible industrial activity in the year following the year to which the annual allocation adjustment relates, then the person must—
 - (i) by 30 April in the year following the year to which the annual allocation adjustment relates, notify the EPA of the person's annual allocation adjustment; and
 - (ii) by 31 May in the year following the year to which the annual allocation adjustment relates, repay the number of units in the annual allocation adjustment by transferring the units to a Crown holding account designated by the EPA.
- (7) If a person is required to repay units under this section, then—
- (a) the units repaid must be of a type that may be transferred to a surrender account at the time the units are repaid; and
 - (b) sections 134 and 135 apply, with any necessary modifications, as if—
 - (i) the units the person is required to repay were units transferred to the person in error; and
 - (ii) the requirement to repay the units arose under section 125.

 - (a) is not immediately to be treated as having ceased to carry out the activity; but
 - (b) must, if the person does not carry out the activity for a period of 3 months in the year, notify the EPA as soon as practicable after the expiry of that 3-month period of that fact; and
 - (c) must, if given notice by the EPA (following receipt of the person's notice under paragraph (b)) that the EPA is satisfied that the person has ceased to carry out the activity for the year and that the person is required to comply with subsection (1), within 20 working days of the date of the EPA's notice, comply with subsection (1).
- (3) Subject to subsection (4), an eligible person who has complied with subsection (1) during the year in which the person ceased to carry out the eligible industrial activity—

 - (b) may not calculate an annual allocation adjustment under section 83 in respect of that year.

- (4) A person who has applied for or notified a closing allocation adjustment in accordance with subsection (1) during a year, but who then recommences carrying out the activity in the year,—
- (a) may calculate an annual allocation adjustment for the year in accordance with the following formula:

where—

AA is the person's annual allocation adjustment of units for the eligible industrial activity for the year

PA is the person's provisional allocation for the eligible industrial activity for the year notified by the EPA under section 86B

FA is the person's final allocation entitlement for the eligible industrial activity for the year (which must be calculated in accordance with section 83(2))

CAA is the amount of the person's closing allocation adjustment for the eligible industrial activity; and

- (b) is entitled to be allocated the number of units in the person's annual allocation adjustment (as calculated under paragraph (a)) in accordance with section 83(5).

- (1) The purpose of this section is to suspend temporarily the allocation entitlement of an eligible person in respect of an eligible industrial activity until the relevant participants face full surrender obligations.
- (2) This section applies to the allocation entitlement (including the provisional allocation entitlement) of an eligible person in respect of an eligible industrial activity calculated under sections 81 to 84.

- (3) Despite anything in this Act, an eligible person who carries out an eligible industrial activity is entitled to be allocated, in respect of an application made under section 86, only half of the person's allocation entitlement during the period—
- (a) beginning on the day that this section comes into force; and
 - (b) ending on the close of the date specified for the purpose of this section as the closure date by an Order in Council made by the Governor-General on the recommendation of the Minister.

85 Allocation of New Zealand units in relation to agriculture

- (1) A person is eligible for an allocation of New Zealand units for an eligible agricultural activity in respect of a year if the person carries out the activity at any time in the year.
- (2) An eligible person is entitled to an allocation for the eligible agricultural activity in respect of the year calculated in accordance with the following formula:

$$A = LA \times \sum(PDCT \times AB)$$

where—

A is the person's allocation entitlement for the eligible agricultural activity for the year

LA is the level of assistance for the eligible agricultural activity for the year, being—

- (a) 0.9 for the first year in which surrender obligations are applicable for the activity; and
- (b) in each year after the first year in which surrender obligations are applicable for the activity, the level of assistance from the previous year less 0.01 (the phase-out rate for an eligible agricultural activity)

\sum is the symbol for summation (of each $PDCT \times AB$ calculation)

PDCT is the total amount of each product from the eligible agricultural activity produced by the person in the year as determined, if relevant, in accordance with regulations made under this Act

AB is the prescribed allocative baseline for the applicable product.

- (3) Despite section 86(1)(c), a person who ceases to carry out an eligible agricultural activity in a year may, within 20 working days of ceasing to carry out the activity, apply under section 86 for an allocation for that year calculated in accordance with the formula in subsection (2).
- (4) A person—
 - (a) is not to be treated as having ceased to carry out an eligible agricultural activity for the purposes of subsection (3) and section 59, if the person does not continuously carry out the activity during a year; but
 - (b) must, if the person does not carry out the eligible agricultural activity for a period of 3 months in a year, be treated as having ceased to carry out the activity in the year.
- (5) Subject to subsection (6), an eligible person who has applied for an allocation for a year (the **closing year**) in accordance with subsection (3) may not apply under section 86 for a further allocation in respect of the closing year.
- (6) An eligible person who has applied in accordance with subsection (3) for an allocation in respect of a closing year, but who then recommences carrying out the activity in the closing year may apply under section 86 for an allocation in respect of the part of the year after the date the person recommenced carrying out the activity (and which was not covered by the application made in accordance with subsection (3)) and, for that purpose, subsection (2) applies as if the year were the part of the year from the date the person recommenced carrying out the activity.

86B Decisions on applications for allocations of New Zealand units to industry and agriculture

- (1) On receipt of an application under section 86, the EPA must decide—
 - (a) whether the applicant is eligible to receive an allocation in respect of the application:
 - (b) if in the EPA's opinion the applicant is eligible for an allocation in respect of the application, the number of units the applicant is entitled to be allocated in respect of the application that, if the application relates to a provisional allocation for an eligible industrial activity, must—
 - (i) include any units to which the person is entitled in respect of an annual allocation adjustment for the previous year; or
 - (ii) be net of any units required to be deducted from the person's provisional allocation entitlement in accordance with section 83(6)(a).
- (2) If the EPA decides under subsection (1) that an applicant is entitled to receive an allocation in respect of the application, then the EPA must—
 - (a) notify the applicant of—
 - (i) the number of units the applicant has been allocated in respect of the application and, in the case of an eligible industrial activity, any adjustment to that allocation that the EPA has made under subsection (1); and
 - (ii) the person's right under section 144 to seek a review of the allocation decision; and
 - (b) direct the Registrar to transfer to the holding account notified in the person's application the number of units notified under paragraph (a) (as adjusted, in the case of an eligible industrial activity, under subsection (1)).
- (3) If the EPA decides under subsection (1) that an applicant is not eligible to receive an allocation in respect of the application, or that the allocation to which the person is entitled in respect of the application is the same as or less than the number of units that the person is liable to repay in respect of an annual allocation adjustment recorded in the application in accordance with section 83(6)(a), then the EPA must notify the applicant of—

- (a) the EPA's decision; and
 - (b) the reasons for the decision; and
 - (c) if the result of the decision is that the person is liable to repay more units than the number of units to which the person would have been entitled in respect of the application, the number of units in the shortfall; and
 - (d) the person's right under section 144 to seek a review of the allocation decision.
- (4) If a person has failed to notify the EPA of an annual allocation adjustment or a closing allocation adjustment when required by section 83(6)(b) or 84(1)(c)(ii), or if the EPA is satisfied that an annual allocation adjustment or closing allocation adjustment notified by a person to the EPA under section 83(6)(b) or 84(1)(c)(ii) is incorrect, then the EPA may make a decision as to the person's annual allocation adjustment, or closing allocation adjustment or correct annual allocation adjustment or closing allocation adjustment.
- (5) The EPA must, as soon as practicable, after deciding an eligible person's final allocation for an eligible activity in respect of a year,—
 - (a) publish the decision in the *Gazette*; and
 - (b) ensure it is accessible via the Internet site of the EPA.
- (6) For the purposes of subsection (5),—
 - (a) the final allocation of a person who received a provisional allocation for an eligible industrial activity is the person's provisional allocation for the activity in respect of the year adjusted by the annual allocation adjustment for the activity for the year (or closing allocation adjustment, as the case may be); and
 - (b) the EPA is not required to publish the final allocation of an eligible person for an eligible activity in respect of a year, or ensure it is accessible via the Internet, if the EPA considers that publishing that information would be likely to prejudice unreasonably the commercial position of the eligible person who received the allocation.

86C Reconsideration of allocation decisions

- (1) Without limiting section 144, the EPA may reconsider, vary, or revoke any decision made under section 86B if in the EPA's opinion the decision has resulted, or would otherwise result, in a person receiving an incorrect allocation because—
 - (a) of an error in the calculation of the person's entitlement to an allocation or liability to repay units under this subpart; or
 - (b) the person has provided altered, false, incomplete, or misleading information in or with an application.
- (2) The EPA may not make a decision in relation to an annual allocation adjustment or a closing allocation adjustment under section 86B(4) or vary or revoke a decision under subsection (1) after the expiration of 4 years from the end of the year or other period to which the decision relates if the decision, or variation or revocation of the decision, would decrease the number of units allocated to a person.
- (3) However, if the EPA is satisfied that a notice under section 83(6)(b) or 84(1)(c)(ii) or application for an allocation, or any other document submitted under section 86, 86E, or 144, was submitted with intent to deceive, the EPA may make a decision in relation to an annual allocation adjustment or a closing allocation adjustment under section 86B(4) or vary or revoke a decision under subsection (1) at any time so as to decrease the number of units allocated to the person to whom the notice or application related (including decreasing that number to zero).
- (4) If the EPA makes a decision in relation to an annual allocation adjustment or a closing allocation adjustment under section 86B(4) or varies or revokes a decision under subsection (1), the EPA must, as soon as practicable after doing so, notify the person who gave, or should have given, the notice under section 83(6)(b) or 84(1)(c)(ii) or the applicant, as the case may be, of—
 - (a) the particulars of the decision, or variation or revocation of the decision; and
 - (b) any grounds or information upon which the decision or variation or revocation of the decision was based; and
 - (c) the person's right under section 144 to seek a review of the allocation decision.

- (5) If the result of a decision in relation to an annual allocation adjustment or a closing allocation adjustment under section 86B(4), variation or revocation of an allocation decision under subsection (1), or review under section 144 is that a person allocated units is found to have been allocated and transferred—
- (a) units to which the person was not entitled, or to have repaid too few units, the person must within 60 working days of the date of the notice under subsection (4) repay the number of units notified to the person by transferring the units to a Crown holding account designated by the EPA; or
 - (b) fewer units than the person was entitled to, or to have repaid too many units, the EPA must, as soon as practicable after the date of the notice under subsection (4), direct the Registrar to transfer to the holding account notified in the person's application (or any other holding account notified by the person) the number of New Zealand units recorded in the notice.
- (5A) Any additional allocation made under subsection (5)(b) must be excluded from the calculation of the number of New Zealand units that may be allocated for the purpose of a recommendation made under section 30GA(1)(a).
- (6) Section 83(7) applies to repayment of units under subsection (5) as if it were repayment under section 83.

 - (c) advises that, unless both the units are transferred to the designated Crown holding account or surrendered (as the case may require) and the penalty paid in full by the due date, interest on the amount of the penalty will accrue in accordance with section 137.
- (4) To avoid doubt, any liability to transfer units to a Crown holding account or surrender units and pay a penalty under subsection (2) is additional to, and does not affect, the liability of a person to surrender or repay units under any other section of this Act or to pay a penalty under a penalty notice given by the EPA under section 134 or 134A.
- (5) The amount of the excess emissions penalty, together with any interest that accrues on that penalty, constitutes a debt due to the Crown and is recoverable by the EPA in a court of competent jurisdiction.

137 Interest for late payment

- (1) This section applies if—
 - (a) a person—

- (i) has failed to surrender or repay units when required to do so and is liable to pay an excess emissions penalty in relation to those units under section 134(2)(b)(i) or (iii) or 134A(2)(b); or
 - (ii) is required to surrender or repay units under section 123 and is liable to pay an excess emissions penalty in relation to those units under section 134(2)(b)(ii) or 134A(2)(b); or
 - (iii) is required to transfer units to a Crown holding account or surrender units and pay an excess emissions penalty under section 136; and
 - (b) the person does not comply, or comply in full, with the requirement to surrender or repay units and to pay the penalty by the relevant date.
- (2) If this section applies, the person is liable to pay interest on the full amount of the excess emissions penalty—
- (a) at the rate prescribed by the Governor-General by Order in Council; and
 - (b) for the period from the date by which the penalty was due to be paid until the associated liability to surrender or repay units or to transfer units to a Crown holding account under section 136 (or to pay any associated debt under section 159) has been met, and until the penalty and any interest due have been paid in full.
- (3) To avoid doubt, interest accrues under subsection (2) even if the amount of the excess emissions penalty in a penalty notice has been paid in full if the associated requirement to surrender or repay units or to transfer units to a Crown holding account under section 136 (or to pay any associated debt under section 159) has not been met in full.
- (4) Despite anything in this section, the EPA may remit any amount of interest that has accrued under this section, if the EPA is satisfied that—
- (a) the failure of the person to comply with the requirement to surrender or repay units or to transfer units to a Crown holding account under section 136 and pay the penalty in full arises as a result of an event or a circumstance beyond the control of that person; and
 - (b) as a consequence of that event or circumstance, the person has a reasonable justification or excuse for the non-compliance; and
 - (c) the person corrected the failure to comply as soon as practicable.
- (5) Without limiting the EPA's discretion under subsection (4), an event or circumstance may include—
- (a) an accident or a disaster; or
 - (b) illness or emotional or mental distress.
- (6) Despite anything in this section, the EPA may remit part of an amount of interest that has accrued under this section if the EPA is satisfied that it would be manifestly unfair or unjust to impose the full amount.

- (7) For the purposes of this section, an **event or circumstance** does not include—
- (a) an act or omission of an agent of a person, unless the EPA is satisfied that the act or omission was caused by an event or circumstance beyond the control of the agent—
 - (i) that could not have been anticipated; and
 - (ii) the effect of which could not have been avoided by compliance with accepted standards of business organisation and professional conduct; or
 - (b) a person's financial position.

 - (ii) it is not economically viable to import or export the output of the activity.
- (2) If an activity meets the criteria in section 161A(3)(a) in accordance with subsection (1), any regulations that prescribe the activity as an eligible industrial activity and the products to be used as the basis for an allocation of New Zealand units in respect of the activity must prescribe the allocative baseline or baselines of each product, calculated in accordance with the following formula:

$$AB = SE/STA$$

where—

AB is the allocative baseline of the product

SE is the specified emissions from the activity

STA is the specified total amount of the product from the activity.

- (3) For the purposes of this section,—
 - (a) the specified revenue from an activity is the amount of revenue obtained by adding together the revenue from the activity of persons who provided the information referred to in section 161D(1)(e)(i)(A) to the Minister in accordance with a notice under section 161D(1) that contained a description of the activity:

 - (d) the specified total amount of product from the activity is the amount of the product obtained by adding together the amount of the product produced by each person who provided the information referred to in section 161D(1)(e)(i)(D) to the Minister in accordance with a notice under section 161D(1) that contained a description of the activity.
- (4) Despite subsection (3)(c), the Minister may adjust the number of whole tonnes of included emissions shown in the information referred to in section 161D(1)(e)(i)(C) provided by any persons carrying out an activity specified in a notice given under section 161D(1) after taking into account any electricity-related contract that was in force on the date of the notice that affects the electricity cost increase that any of the persons will face due to the obligation imposed by this Act on participants to surrender units, or any information relating to any such contracts.
- (5) If the Minister has adjusted the tonnes of emissions of 1 or more persons under subsection (4), the Minister may use both the information as originally submitted and as adjusted to calculate different allocative baselines for the relevant product.

178A Option to pay money instead of surrendering units to cover emissions

- (1) This section applies if—
 - (a) a person is required to surrender or repay units—
 - (i) under section 65(4), 118(5), 189(8), or 193 for emissions from any activity; or
 - (ii) under section 183A(2)(b), 187, or 191; or
 - (b) the EPA is required under section 123(4), 186H, 187, 189(7)(d), or 191 to arrange for the reimbursement of units—
 - (i) for emissions from any activity; or
 - (ii) because approval is revoked or the offsetting forest land has not become pre-1990 offsetting forest land before deforestation of the relevant pre-1990 forest land.
- (2) Despite anything in this Act, if this section applies, a person may satisfy the person's obligation to surrender, repay, or reimburse units,—
 - (a) in the case of a person other than the EPA, by—
 - (i) surrendering or repaying the units in accordance with section 65(4), 118(5), 183A(2)(b), 186H, 187, 189(8), 191, or 193, as applicable; or
 - (ii) paying a sum of \$25 for each unit that the person is liable to surrender or repay, into a Crown Bank Account, by the date or within the period by which the units are required to be surrendered or repaid; or
 - (iii) a combination of the actions provided for in subparagraphs (i) and (ii); or
 - (b) in the case of the EPA, by—

- (i) reimbursing units to a person in accordance with the procedure specified in section 124; or
 - (ii) paying a sum of \$25 for each unit into a bank account designated by the person; or
 - (iii) a combination of the actions provided for in subparagraphs (i) and (ii).
- (3) For the purposes of subsection (2)(a)(ii) and (iii), a person's obligation to surrender units or repay units is only satisfied when the funds paid into a Crown Bank Account are cleared.
- (4) For the purposes of subsection (3) and section 178B(1), funds paid into a Crown Bank Account are to be treated as cleared when it is no longer possible to reverse the payment and the funds are available for use by the Crown.

Section 178A: inserted, on 1 January 2013, by section 71 of the Climate Change Response (Emissions Trading and Other Matters) Amendment Act 2012 (2012 No 89).

178B Issuing New Zealand units to meet surrender obligations

- (1) If, in accordance with section 178A(2)(a)(ii) or (iii), a person pays a sum of \$25 instead of surrendering a unit that the person is liable to surrender, the Registrar must, when the funds are cleared,—
 - (a) issue a number of New Zealand units into a Crown holding account equal to the number of units in respect of which the person has paid a sum of \$25 for each unit; and
 - (b) transfer the New Zealand units into the person's holding account held for the purpose of section 61(1); and
 - (c) immediately following the transfer under paragraph (b), transfer the New Zealand units to a surrender account designated by the EPA.
- (2) The Registrar may, for the purposes of subsection (1)(a), issue a number of New Zealand units equal to the number of units in respect of which 1 or more persons have paid a sum of \$25 for each unit under section 178A(2)(a)(ii) or (iii).
- (3) If the EPA is required to reimburse a person units under section 123(4), 186H, or 189(7)(d) and has satisfied its obligation to do so by paying to the person a sum of \$25 for each unit in accordance with section 178A(2)(b)(ii) or (iii), then the Registrar must—
 - (a) transfer from the appropriate surrender account to the person's holding account held for the purpose of section 61(1) a number of New Zealand units equal to the number of units for which the EPA paid the person a sum of \$25 for each unit; and
 - (b) immediately following the transfer under paragraph (a), transfer the New Zealand units from the person's holding account to a cancellation account.

- (4) For the avoidance of doubt, section 68 does not apply in respect of any New Zealand units issued under this section.
- (5) If subsection (1) applies, this Act applies with any necessary modification as if the payment of \$25 for a unit by a person and the transfer of a unit to a surrender account by the Registrar under this section were a surrender of a unit by the person.
- (6) Despite anything in section 18CA(4), a New Zealand unit that is transferred to a surrender account under subsection (1)(c) may be further transferred in accordance with subsection (3)(a).

Section 178B: inserted, on 1 January 2013, by section 71 of the Climate Change Response (Emissions Trading and Other Matters) Amendment Act 2012 (2012 No 89).

178C Prohibition on ability to export New Zealand units

- (1) Despite anything in this Act,—
 - (a) an account holder may not apply to the Registrar under section 30E(1)(a) to convert a New Zealand unit held by that person into a designated assigned amount unit for the purposes of transferring that assigned amount unit to an account in an overseas registry; and
 - (b) the Registrar must not transfer to an account in an overseas registry under section 18C—
 - (i) New Zealand units; or
 - (ii) designated assigned amount units that have been converted from New Zealand units under section 30E(3) before the commencement of this section.
- (2) This section does not apply to New Zealand units—
 - (a) in respect of activities listed in Part 1 of Schedule 4; or
 - (b) transferred in accordance with a determination of the Minister under section 77 or 78 that relates to an allocation under the pre-1990 forest land allocation plan; or
 - (c) received under the Forests (Permanent Forest Sink) Regulations 2007.

179 Forest land to be treated as deforested in certain cases

- (1) Without limiting paragraph (a) of the definition of deforest in section 4(1), a hectare of forest land must be treated as deforested for the purposes of this Act if the forest species on that hectare have been cleared and,—
 - (a) 4 years after clearing, the hectare has not—
 - (i) been replanted with at least 500 stems of forest species; or
 - (ii) regenerated a cover of at least 500 stems of exotic forest species; or
 - (iii) been replanted with at least 100 stems of willows or poplars in a manner consistent with managing soil erosion; or
 - (iv) regenerated predominantly indigenous forest species growing in a manner in which the hectare is likely to be forest land 10 years after the hectare was cleared; or
 - (b) 10 years after clearing,—
 - (i) predominantly exotic forest species are growing, but that hectare does not have tree crown cover of at least 30% from trees that have reached 5 metres in height; or
 - (ii) predominantly indigenous forest species are growing, but that hectare is not forest land; or
 - (c) 20 years after clearing, predominantly indigenous forest species are growing, but that hectare does not have tree crown cover of at least 30% from trees that have reached 5 metres in height.
- (1A) Subsection (1)(a)(iii) applies only if the EPA is satisfied that the relevant local authority has determined that the soil erosion risk of the land is at least moderate.
- (2) If forest land is to be treated as deforested under subsection (1),—
 - (a) the deforestation is to be treated as having been carried out 4 years, 10 years, or 20 years, after the clearing of the forest species, as the case may be; but
 - (b) the liability in respect of the deforestation must be calculated by reference to the age and forest species of the trees cleared 4 years, 10 years, or 20 years earlier, as the case may be.
- (3) Nothing in this section limits the EPA's ability to exercise powers under section 121 in respect of the deforestation of a hectare of forest land whenever the EPA considers that—
 - (a) the hectare has been converted to land that is not forest land; and

- (b) any obligations imposed under this Act in respect of the deforestation have not been complied with.

- (1) Despite section 179 and the definition of deforest in section 4(1),—
 - (a) in the case of pre-1990 forest land, pre-1990 forest land that is cleared may not be treated as deforested for the purposes of this Act if the cleared land is exempt land or—
 - (i) is contiguous with the edge of pre-1990 forest land that existed on 31 December 2007; and
 - (ii) is an area that is less than 1 hectare or that is less than 30 metres wide at its widest point; and
 - (iii) is required to be or remain cleared to implement New Zealand's best practice forest management; and
 - (iv) is used only for the purpose of implementing New Zealand's best practice forest management:
 - (b) in the case of pre-1990 forest land that is the subject of an offsetting forest land application that the EPA has approved under section 186B, the pre-1990 forest land that is cleared may not be treated as deforested if cleared,—
 - (i) in the case where the land is converted to a use other than forest land (for example, dairy), in the period—
 - (A) beginning on the date that the approval is given; and
 - (B) ending with the earlier of 2 years after the date that the approval was given or 4 years after the date that the pre-1990 forest land was cleared; or

 - (B) ending 4 years after the date that the pre-1990 forest land was cleared:

- (c) in the case of post-1989 forest land, the post-1989 forest land that is cleared may not be treated as deforested if the cleared land—
 - (i) is contiguous with the edge of post-1989 forest land that existed on the date of registration; and
 - (ii) is an area that is less than 1 hectare or that is less than 30 metres wide at its widest point; and
 - (iii) is required to be or remain cleared to implement New Zealand's best practice forest management; and
 - (iv) is used only for the purpose of implementing New Zealand's best practice forest management.
- (2) Subsection (1)(b) does not apply if the EPA revokes its approval of an offsetting forest land application under section 186G(1).
- (3) This section applies to land that was cleared before, on, or after the commencement of this section.

180 Participant in respect of pre-1990 forest land

- (1) If the activity listed in Part 1 of Schedule 3 is carried out, the landowner of the pre-1990 forest land is to be treated as the person carrying out the activity unless the EPA is satisfied that—
 - (a) the right to decide to deforest the pre-1990 forest land was vested by the landowner in a third party, whether before or after 1 January 2008; and
 - (b) the landowner had no control over the decision.
- (2) If the EPA is satisfied that the criteria specified in subsection (1)(a) and (b) are met, the third party is to be treated as the person carrying out the activity.

 - (f) be signed by the applicant; and

- (g) be accompanied by any other prescribed information.
- (4) If the EPA is satisfied that the applicant is a person to whom this section applies, the land is pre-1990 forest land, and each of the criteria specified in subsection 2(a) to (c) is met, the EPA must—
 - (a) declare the land to be exempt land; and
 - (b) notify the applicant that the land has been declared exempt land.

- (6) The following rules apply for the purposes of determining, under subsection (2)(b), whether an area of pre-1990 forest land was owned on 1 September 2007 by a person or persons who, along with any associated persons, owned in total less than 50 hectares of pre-1990 forest land:
 - (a) the EPA must consider only pre-1990 forest land in respect of which the person or associated person was a landowner on 1 September 2007; and
 - (b) if land was owned by persons as joint tenants,—
 - (i) in the case where 1 or more of the joint tenants is a professional trustee, each of the joint tenants other than the professional trustee or trustees must individually have been a landowner of less than 50 hectares of pre-1990 forest land; or
 - (ii) in the case where none of the joint tenants is a professional trustee, each of the joint tenants must individually have been a landowner of less than 50 hectares of pre-1990 forest land; and
 - (c) if land was owned by persons as tenants in common, each tenant in common's interest in the land is to be treated as a divided interest on 1 September 2007; and
 - (d) if land was owned by a sole professional trustee or owned by professional trustees only, the total pre-1990 forest land held in the trust on 1 September 2007 was less than 50 hectares.

183A Certain applications not otherwise permitted by section 183

- (1) Despite section 183(2)(c) and (3)(a), a person may make an application under section 183 by 31 December 2013 if—
 - (a) the area concerned was owned, as at 1 September 2007, by a sole professional trustee or by professional trustees only; and
 - (b) an allocation of units has been made before the commencement of the Climate Change Response (Emissions Trading and Other Matters) Amendment Act 2012 in respect of the area under an allocation plan under section 72.
- (2) If the EPA proposes to accept the application, the EPA must notify the applicant that—

- (a) it proposes to accept the application; but
 - (b) the applicant must first, within 30 working days after receiving the notice, surrender or repay to the Crown holding account specified in the notice the number of New Zealand units specified in the notice; and
 - (c) if the units are not surrendered or repaid in accordance with paragraph (b), then the application will be declined.
- (3) The units referred to in subsection (2) must be the same number of units that have been allocated and transferred under an allocation plan under section 72 in relation to the land concerned.
- (4) The EPA must,—
 - (a) accept the application and declare the area concerned to be exempt land if, by the expiry of the 30 days, the units have been surrendered or repaid; or
 - (b) decline the application if, by the expiry of the 30 days, the units have not been surrendered or repaid.
- (5) To avoid doubt,—

184 Exemptions for deforestation of land with tree weeds

- (1) The EPA may give public notice that exemptions are available in relation to the deforestation of pre-1990 forest land if—
 - (a) a forest species growing on the land, or that was cleared from the land as part of the deforestation process on or after 1 January 2008, is or was a specified type of tree weed; and
 - (b) no allocation of units to a landowner has been made in respect of the land under the pre-1990 forest land allocation plan.
- (2) A notice given under subsection (1) must include—
 - (a) the types of tree weeds in respect of which exemptions may be available; and
 - (b) the criteria and priorities by which exemptions will be assessed, which may include the type of tree weed, the location of forest land, or any other matter; and

- (c) the date by which applications for exemptions under this section must be received by the EPA; and
 - (d) the number of whole tonnes of emissions from the deforestation of the specified types of tree weed that will be covered by exemptions granted in relation to the notice.
- (3) If a notice has been given under subsection (1), the landowner of pre-1990 forest land on which there is or was a specified type of tree weed or, in the circumstances referred to in section 180, a third party may apply to the EPA for the land to be declared exempt land.
- (4) An application for an exemption under subsection (3) must—
 - (a) be submitted to the EPA before the date notified under subsection (2)(c); and
 - (b) be in the prescribed form and accompanied by the prescribed fee (if any); and
 - (c) contain details of the land to which the application relates; and
 - (d) be accompanied by evidence that—
 - (i) the land is pre-1990 forest land; and
 - (ii) a forest species growing on the land, or that grew on the land before it was cleared as part of the deforestation process, is or was a specified type of tree weed; and
 - (e) be signed by the applicant; and
 - (f) be accompanied by any other prescribed information.
- (5) The EPA must consider every application received under subsection (4) against the criteria, and priorities in, and the number of whole tonnes of emissions that are to be covered by exemptions granted in respect of, the relevant notice given under subsection (1) and—
 - (a) may declare the land, or any part of the land, to be exempt land, if satisfied that—
 - (i) the applicant is eligible to apply for the exemption under subsection (3); and
 - (ii) the land is pre-1990 forest land; and
 - (iii) the criteria specified in subsection (1) are met; and
 - (b) must, if the EPA declares any land to be exempt land, notify the applicant accordingly.
- (6) The clearing of tree weeds on exempt land that has not been cleared before the land was declared exempt land must be—
 - (a) commenced within 24 months of the date of notification of the exemption; and
 - (b) completed by the end of—

- (i) the first commitment period, if the exemption is granted in that commitment period; or
 - (ii) any subsequent commitment period in which the exemption is granted; or
 - (iii) if there is no subsequent commitment period,—
 - (A) the 5-year period commencing on 1 January 2013, if the exemption is granted in that 5-year period; or
 - (B) any subsequent 5-year period, after the period in subsubparagraph (A), in which the exemption is granted.
- (7) Any land that is declared to be exempt land under this section ceases to be exempt land if either of the conditions specified in subsection (6) is breached.
- (8) If a person is convicted of an offence under section 132 or 133 in relation to an application under this section,—
 - (a) the person must be treated as a person who has failed to submit an annual emissions return in respect of an activity listed in Part 1 of Schedule 3 when required to do so under this Act; and
 - (b) the EPA must make an assessment of the matters that should have been in the person's annual emissions return and the number of units the person would have been liable to surrender if the land had not been exempt land; and
 - (c) the person is liable to surrender the number of units in the assessment under paragraph (b); and
 - (d) section 123(1) to (3) and the other provisions of this Act apply as if the assessment under paragraph (b) was an assessment under section 121.

 - (D) pre-1990 forest land (other than exempt land) that was deforested on or after 1 January 2013 and offset by pre-1990 offsetting forest land, and is (at the time the offsetting forest application is made) not forest land; or
 - (E) exempt land that has been deforested and in respect of which the number of units that would have been required to be surrendered in relation to the activity in Part 1A of Schedule 3 had the land not been exempt land has been surrendered, and is (at the time the offsetting forest application is made) not forest land; and
- (b) the land is land—
- (i) that has a total area (whether or not contiguous) that is equal to or greater than the total area of the pre-1990 forest land that is to be offset by that land (whether or not contiguous); and
 - (ii) in which each individual parcel that makes up the total area of the offsetting forest land is at least 1 hectare with an average width of at least 30 metres; and

- (i) become forest land before the relevant pre-1990 forest land is deforested; and
 - (ii) be established by direct planting activities, including direct seeding but excluding natural forest regeneration; and
 - (iii) be established on the land specified in the application approved by the EPA; and
 - (iv) achieve carbon equivalence with the relevant pre-1990 forest land:

- (2) If the EPA is not satisfied that the land subject to an approved offsetting forest land application has become forest land by the time that the relevant pre-1990 forest land is deforested,—
- (a) the application is to be treated as revoked under section 186G; and
 - (b) the person who owns the pre-1990 forest land must surrender units for the deforested pre-1990 forest land.
- (3) If the EPA is satisfied that the offsetting forest land has become forest land by the time that the pre-1990 forest land is deforested, the EPA must, on a register kept for the purposes of this section, note—
- (a) that the offsetting forest land is pre-1990 offsetting forest land; and
 - (b) any conditions placed on that forest land under section 186C or 186F; and
 - (c) the emissions for the relevant pre-1990 forest land.
- (4) The EPA must, upon written request by the person who owns or owned (or who is a prospective transferee of) the relevant pre-1990 offsetting forest land or the relevant pre-1990 forest land, provide a statement containing the information specified in subsection (3) to the person or prospective transferee (as the case may be).

- (2) If this subsection applies, the participant must,—
 - (a) for the purposes of sections 62(b) and 65(2)(b), apply any prescribed methodology and calculate and record the emissions from the activity as if the trees cleared from the pre-1990 offsetting forest land were trees of the age and species of the oldest trees of the predominant species (as determined by regulations made under section 163 or 186F) cleared from the pre-1990 offsetting forest land during the previous 9 years (excluding any period in which the pre-1990 forest land is temporarily unstocked); and
 - (b) surrender units under this Act based on emissions calculated and recorded in accordance with paragraph (a).

 - (iii) contain an assessment of the participant's gross liability to surrender units for emissions or entitlement to receive New Zealand units for removals from the carbon accounting area that takes into account sections 188(10) and 190(1), but does not take into account any returns under subsection (3) that cover part of the same period as the emissions return; and
 - (iv) contain the information required by subsection (6), if relevant; and
 - (v) contain an assessment of the participant's net liability to surrender units in respect of emissions or entitlement to receive New Zealand units for removals from the carbon accounting area during the emissions return period, taking into account sections 188(10) and 190(1) and subsections (6) and (7); and

- (8) A person who submits an emissions return under this section—
- (a) may include in the return an assessment of the person's net liability to surrender or repay units, or the person's net entitlement to New Zealand units, calculated by determining the difference between the total number of units required to be surrendered for emissions from each of the carbon accounting areas covered by the return (or, if relevant, required to be re-

- paid in respect of the carbon accounting areas covered by the return) and the total number of New Zealand units to which the person is entitled in respect of removals from each of the carbon accounting areas covered by the return (or, if relevant, is entitled to be reimbursed in respect of carbon accounting areas covered by the return); and
- (b) may elect to surrender or repay the net number of units for which the person is liable, or to receive the net number of New Zealand units to which the person is entitled, as determined under paragraph (a); and
 - (c) must, if the person makes an election under paragraph (b), indicate clearly in the return that such an election has been made; and
 - (d) must, if an assessment in the emissions return shows a liability or a net liability to—
 - (i) surrender units, surrender those units within 20 working days of submitting the emissions return; or
 - (ii) repay units, repay those units, by transferring the number of units required to be transferred, within 60 working days of submitting the emissions return, to a Crown holding account designated by the EPA, and the provisions of sections 134 and 135 apply, with any necessary modifications, as if—
 - (A) the units the person is required to repay were units transferred to the person in error; and
 - (B) the requirement to repay the units arose under section 125.
- (8A) Despite subsection (8)(d), a person who submits an emissions return under this section that shows a liability or a net liability is under no obligation to surrender units if—
- (a) the emissions return is in respect of post-1989 forest land; and
 - (b) that land is affected by a natural event that permanently prevents re-establishing a forest on that land.
- (9) In this section,—
- mandatory emissions return period** means any of the following periods:
- (a) the first commitment period:
 - (b) any subsequent commitment period or, if there is no subsequent commitment period,—
 - (i) the 5-year period commencing on 1 January 2013;
 - (ii) each subsequent 5-year period after the period specified in subparagraph (i)
- units surrendered**, in relation to an emissions return under subsection (3), include units that a person would have been required to surrender in respect of emissions covered by the return, but which were not actually surrendered because of an election under subsection (8)

units transferred for removals, in relation to an emissions return under subsection (3), include units that a person would have been entitled to receive for removals in respect of the return, but which were not actually transferred because of an election under subsection (8).

190 Special rules regarding surrender of units in relation to post-1989 forest land

- (1) Despite section 63, a person who is or was a participant in respect of an activity listed in Part 1 of Schedule 4 is not liable to surrender more units in relation to any carbon accounting area or part of a carbon accounting area than the unit balance of that carbon accounting area or part of a carbon accounting area.
- (2) The unit balance of a carbon accounting area must be calculated in accordance with the following formula:

$$UB = (A - B) + OUB$$

where—

UB is the unit balance of the carbon accounting area

A is the net number of New Zealand units transferred for removals from the carbon accounting area since the date it was constituted (that is, the number of units transferred for removals less any units repaid under section 123(6) or 189(8))

B is the net number of New Zealand units surrendered for emissions from the carbon accounting area since the date it was constituted (that is, the number of units surrendered, less any units reimbursed under section 124 or 189(7))

OUB is,—

- (a) if the carbon accounting area is constituted from land from another carbon accounting area (following the removal of land from a carbon accounting area, or transmission of an interest as defined in section 192), the opening unit balance of the carbon accounting area, as determined in accordance with subsection (3); or
 - (b) if the carbon accounting area is not constituted as described in paragraph (a), but is constituted from land that was subject to a forest sink covenant under section 67ZD of the Forests Act 1949, the net number of units transferred in respect of the land in the carbon accounting area while it was the subject of the forest sink covenant; or
 - (c) if the carbon accounting area is not constituted from land from another carbon accounting area or land that was subject to a forest sink covenant, zero.
- (3) The following provisions apply if a person is required by this subpart to calculate the unit balance of a newly constituted carbon accounting area:
 - (a) if a carbon accounting area (CAA2) has been constituted under section 192(3)(b)(iii) from the land remaining in an affected carbon accounting area (CAA1) following transmission of an interest in part of the CAA1, the person must calculate the opening unit balance of CAA2 in accordance with subsection (4), and for the purposes of that calculation—

- (i) H is the number of hectares of post-1989 forest land in CAA1; and
 - (ii) Hp is the number of hectares of post-1989 forest land in CAA2; and
 - (iii) UB is the unit balance of CAA1 calculated in accordance with subsection (2) (and includes any units transferred or surrendered in respect of the removals or emissions reported in the emissions return submitted under section 193(1)); and
 - (iv) UBp is the opening unit balance for CAA2 for the purposes of subsection (2):
- (b) if a carbon accounting area (**CAA2**) has been constituted under section 188(7)(b)(ii)(B) from the land remaining in a carbon accounting area (**CAA1**) because the person has removed land from CAA1 or ceased carrying out an activity listed in Part 1 of Schedule 4 in respect of part of CAA1, the opening unit balance of CAA2 is the figure calculated under section 191(4) for UB_r for the purposes of the person's emissions return under section 191(3):
- (c) if a carbon accounting area (**CAA2**) has been constituted by operation of section 192(3)(b)(ii), the person must calculate the opening unit balance of CAA2 by—
- (i) calculating the unit balance of any whole carbon accounting areas that form part of CAA2 in accordance with subsection (2), including (but not limited to) any units transferred or surrendered in respect of the removals or emissions reported in the emissions return under section 193(1); and
 - (ii) calculating the unit balance of any part carbon accounting area that forms part of CAA2 in accordance with subsection (4), and for the purposes of that calculation—
 - (A) H is the number of hectares of post-1989 forest land in the carbon accounting area of which the part carbon accounting area formed a part before the transmission of the interest; and
 - (B) Hp is the number of hectares of post-1989 forest land in the part carbon accounting area; and
 - (C) UB is the unit balance of the carbon accounting area of which the part carbon accounting area formed a part before the transmission of the interest, including (but not limited to) any units transferred or surrendered in respect of the removals or emissions reported in the emissions return under section 193(1); and

- (iii) adding together the unit balances obtained under subparagraphs (i) and (ii).
- (4) The unit balance of part of a carbon accounting area must be calculated in accordance with the following formula:

$$UBp = UB/H \times Hp$$

where—

UBp is the unit balance of the part of the carbon accounting area

UB is the unit balance of the carbon accounting area of which the part carbon accounting area formed a part, calculated in accordance with subsection (2)

H is the number of hectares in the carbon accounting area of which the part carbon accounting area formed a part

Hp is the number of hectares in the part of the carbon accounting area for which a unit balance is calculated.

- (5) For the purposes of this section,—
 - (a) units transferred for removals, surrendered, repaid, or reimbursed in respect of a carbon accounting area include units that a person would have been entitled to receive, or would have been required to surrender or repay, in respect of a carbon accounting area, but which were not actually transferred, surrendered, repaid, or reimbursed because of an election under section 189(8); and
 - (b) the date that a carbon accounting area is constituted is—
 - (i) the date the person's registration as a participant in respect of the activity in the application took effect in accordance with section 57(8) for a carbon accounting area defined in an application referred to in section 188(1); and
 - (ii) the date the participant's record is updated under section 188(6) or (7) for a carbon accounting area where land has been removed from a carbon accounting area, a person has ceased to carry out the activity on part of a carbon accounting area, or a person has applied to add a carbon accounting area under section 188(3)(a)(i); and
 - (iii) the date the carbon accounting area was constituted under that section for a carbon accounting area constituted by operation of section 192(3)(b); and
 - (c) **hectare** includes any fraction of a hectare.

Section 190: substituted, on 8 December 2009, by section 66 of the Climate Change Response (Moderated Emissions Trading) Amendment Act 2009 (2009 No 57).

191 Ceasing to be registered as participant in respect of post-1989 forest land

- (1) Subject to section 193, a person who is or was a participant in respect of an activity listed in Part 1 of Schedule 4—
 - (a) must submit an emissions return to the EPA within 20 working days of—
 - (i) being removed from the register in respect of that activity; or
 - (ii) removing a carbon accounting area or ceasing to be a participant in respect of a carbon accounting area in respect of which the person is recorded as a participant under section 188; or
 - (iii) removing land from a carbon accounting area or ceasing to carry out the activity in respect of part of a carbon accounting area in respect of which the person is recorded as a participant under section 188; and
 - (b) is, in respect of any carbon accounting area,—
 - (i) required to be covered by the return under subsection (2), liable to surrender the unit balance of the carbon accounting area; and
 - (ii) required to be covered by the return under subsection (3),—
 - (A) liable to surrender the unit balance relating to any land removed from the carbon accounting area or on which the person has ceased to carry out the activity, plus or minus any units that the person is required to surrender for emissions or entitled to receive for removals in respect of the land remaining in the carbon accounting area, as calculated under subsection (4); or
 - (B) entitled to receive the number of units assessed as the participant's entitlement for removals from the land remaining in the carbon accounting area, less the unit balance relating to any land removed from the carbon accounting area or upon which the person has ceased to carry out the activity, calculated under subsection (4); and
 - (c) must, despite section 63, use only New Zealand units to surrender the unit balance that the person is liable to surrender under paragraph (b).
- (1A) The purpose of subsection (1)(c) is to prevent reregistration arbitrage, which was an unintended consequence in the operation of the Act before the commencement of subsection (1)(c) and arose from significant differences between the price of New Zealand units and the price of certain Kyoto units.
- (2) An emissions return submitted under this section—
 - (a) must,—

- (i) if subsection (1)(a)(i) applies, be in respect of all the carbon accounting areas in respect of which the person is or was recorded as a participant in relation to that activity; or
 - (ii) if subsection (1)(a)(ii) applies, be in respect of the carbon accounting area or areas being removed in respect of which the person is ceasing to be a participant; and
 - (b) must record the unit balance of each carbon accounting area required to be covered by the return under paragraph (a), calculated in accordance with section 190(2).
- (3) An emissions return submitted under this section because subsection (1)(a)(iii) applies must—
 - (a) be in respect of each carbon accounting area from which land is removed or in respect of which the person is ceasing to carry out the activity on part of the land in the carbon accounting area; and
 - (b) for each carbon accounting area required to be covered by the return under paragraph (a), be for the period,—
 - (i) commencing on the latest of—
 - (A) the first day of the mandatory emissions return period (as defined in section 189(9)) in which the land was removed from the carbon accounting area (or the person ceased to carry out the activity on part of the land in the carbon accounting area); or
 - (B) the date on which the land in the carbon accounting area became post-1989 forest land; or
 - (C) the date of constitution of the carbon accounting area (as specified in section 190(5)), if the carbon accounting area was constituted following removal of land from a carbon accounting area under section 188(7)(b)(ii)(B) or transmission of an interest under section 192(3)(b); or
 - (D) if an emissions return has been submitted under section 189(4A) in relation to the carbon accounting area, the day after the end of the period covered by the last emissions return submitted for the carbon accounting area under that section; and
 - (ii) ending on the date the land is removed from the carbon accounting area or the person ceases to carry out the activity on part of the land in the carbon accounting area; and
 - (c) in respect of each carbon accounting area required to be covered by the return under paragraph (a),—

- (i) comply with section 189(5)(a) and (6), as if any references in section 189(6) to subsection (4) of that section were references to this section; and
 - (ii) record the notional unit balance of the carbon accounting area, calculated by taking the unit balance of the carbon accounting area (as calculated under section 190(2)) before submission of the return under this section and, if the assessment recorded in the return under section 189(5)(a)(v) shows the person would be—
 - (A) entitled to receive units in respect of removals from the carbon accounting area during the emissions return period, adding that number of units to the unit balance; or
 - (B) liable to surrender units in respect of emissions from the carbon accounting area during the emissions return period, subtracting that number of units from the unit balance; and
 - (iii) record the person's assessment of the person's net liability to surrender units or entitlement to receive units in respect of the post-1989 forest land being removed from and the land remaining in the carbon accounting area calculated in accordance with subsection (4).
- (4) Net liability to surrender units or entitlement to receive units in respect of a carbon accounting area required to be covered by the return under subsection (3)(a) must be calculated in accordance with the following formula:

$$X = UB_{CAA} - UB_r$$

where—

X is,—

- (a) if positive, the number of units the person must surrender in respect of the land being removed from the carbon accounting area or upon which the person has ceased to carry out the activity (as adjusted by any units required to be surrendered for emissions, or units to which the person is entitled for removals, from the land remaining in the carbon accounting area); or
- (b) if negative, the number of units to which the person is entitled in respect of removals from the land remaining in the carbon accounting area (as adjusted by any units required to be surrendered for the land being removed from the carbon accounting area or in respect of which the person has ceased to carry out the activity)

UB_{CAA} is the unit balance of the carbon accounting area before the removal of the land and submission of the return under this section, calculated in accordance with section 190(2)

UB_r is the unit balance of the land remaining in the carbon accounting area calculated as follows:

$$UB_r = (NUB_{CAA}/H_{CAA}) \times H_r$$

where—

NUB_{CAA} is the notional unit balance of the carbon accounting area calculated under subsection (3)(c)(ii)

H_{CAA} is the number of hectares in the carbon accounting area before removal of the land or before the person ceased to carry out the activity in respect of part of the land

H_r is the number of hectares in the carbon accounting area, less the number of hectares being removed or in respect of which the person has ceased to carry out the activity.

- (5) If a person submits an emissions return under subsection (3), section 189(7) applies to the person as if the references in that provision to subsection (4) were references to this section.
- (6) Section 189(8) applies, with any necessary modifications, to a person who—
 - (a) submits an emissions return under this section; or
 - (b) submits an emissions return in respect of post-1989 forest land that is affected by a natural event that permanently prevents re-establishing a forest on that land because subsection (1)(a)(ii) or (iii) applies.
- (7) An emissions return submitted under this section must be—
 - (a) submitted in the prescribed manner and format; and
 - (b) accompanied by any prescribed fee and any other prescribed information.

 - (a) within 20 working days of the date of transmission of the transmitted interest,—

- (i) the transferor and transferee must notify the EPA of the transmission; and
 - (ii) the transferor must submit an emissions return as required by section 193 in relation to any affected carbon accounting areas; and
- (b) from the date of transmission,—
 - (i) the transferor ceases to be a participant under this Act in relation to the post-1989 forest land to which the transmitted interest relates and the transferee becomes a participant in respect of the activity listed in Part 1 of Schedule 4 that is referred to in the fourth column of the table in subsection (1) in relation to the post-1989 forest land to which the transmitted interest relates; and

- (4) If this section applies because a transmitted interest has been transmitted by operation of law, then—
 - (a) the notice given under subsection (3)(a)(i) must be given as soon as practicable after the date of transmission; and
 - (b) the emissions return required under section 193 must be submitted as soon as possible after the date of the transmission.

 - (a) in the prescribed form; and
 - (b) accompanied by any prescribed fees or charges and any prescribed information; and
 - (c) signed by both the transferor and the transferee.
- (6) Following receipt of a notice complying with subsection (5) and the emissions return required under section 193, the EPA must take such of the following actions as are relevant:
 - (a) if the transferee is not already registered under section 57, enter the transferee's name on the register kept under section 57 as a participant in respect of an activity listed in Part 1 of Schedule 4 that is referred to in the fourth column of the table in subsection (1):
 - (b) if the transferee is already registered under section 57, but not in respect of the activity listed in Part 1 of Schedule 4 that is referred to in the fourth column of the table in subsection (1), amend that registration to show that the transferee is now a participant in respect of that activity:

- (c) if the transferor is registered under section 57 only in respect of carrying out the activity listed in Part 1 of Schedule 4 in respect of post-1989 forest land to which the transmitted interest relates, remove the transferor's name from the register in respect of that activity;
 - (d) update the EPA's records under section 188(2) by—

Part 7: inserted, on 1 January 2013, by section 100 of the Climate Change Response (Emissions Trading and Other Matters) Amendment Act 2012 (2012 No 89).

226 Overview of functions and responsibilities of EPA and agencies under this Part, Customs and Excise Act 1996, and Land Transport Act 1998

- (1) This section is a guide to the functions and responsibilities of the EPA and the agencies in relation to the synthetic greenhouse gas levy, but it does not affect the interpretation or the application of the provisions of this Part, the Customs and Excise Act 1996, or the Land Transport Act 1998.
- (2) Under this Part,—
 - (a) the functions of the EPA are to—
 - (i) receive and collate information from the agencies under section 241; and
 - (ii) publish information in accordance with section 250; and
 - (iii) monitor compliance with subpart 1; and
 - (b) the function of the Registrar of Motor Vehicles is to receive payment of the motor vehicle levy under section 228; and
 - (c) the function of the New Zealand Customs Service is to receive payment of the goods levy under section 229; and
 - (d) it is a function of the EPA and the agencies to recover unpaid levies under section 230.
- (3) Under the Customs and Excise Act 1996, the function of the New Zealand Customs Service is to assess and collect the goods levy and, for this purpose,—
 - (a) assess and collect the levy on goods as if the levy were a duty; and
 - (b) recover unpaid levies as if they were unpaid duties.
- (4) Under the Land Transport Act 1998, the function of the Registrar of Motor Vehicles is to assess and collect the motor vehicle levy.

Section 226: inserted, on 1 January 2013, by section 100 of the Climate Change Response (Emissions Trading and Other Matters) Amendment Act 2012 (2012 No 89).

Subpart 1—Synthetic greenhouse gas levy

Subpart 1: inserted, on 1 January 2013, by section 100 of the Climate Change Response (Emissions Trading and Other Matters) Amendment Act 2012 (2012 No 89).

Levy imposed

Heading: inserted, on 1 January 2013, by section 100 of the Climate Change Response (Emissions Trading and Other Matters) Amendment Act 2012 (2012 No 89).

227 Synthetic greenhouse gas levy imposed

- (1) A levy is imposed on—
 - (a) a leviable motor vehicle that is registered on or after 1 July 2013, but is not imposed on a motor vehicle that was registered before 1 July 2013 and registered again on or after 1 July 2013; and
 - (b) an item of leviable goods that is imported into New Zealand on or after 1 July 2013.
- (2) However, if a leviable motor vehicle is registered more than once on or after 1 July 2013, it is liable for the levy only once.

Section 227: inserted, on 1 January 2013, by section 100 of the Climate Change Response (Emissions Trading and Other Matters) Amendment Act 2012 (2012 No 89).

228 Person who registers leviable motor vehicle responsible for paying levy

- (1) The person who registers a leviable motor vehicle on or after 1 July 2013 is responsible for paying the levy.
- (2) The levy (including any goods and services tax payable on it) must be paid to the Registrar of Motor Vehicles at the same time as the person pays for the registration of the vehicle.

Section 228: inserted, on 1 January 2013, by section 100 of the Climate Change Response (Emissions Trading and Other Matters) Amendment Act 2012 (2012 No 89).

229 Importer of leviable goods must pay levy

- (1) A person who imports leviable goods on or after 1 July 2013 must pay the levy at the prescribed rate for the goods.
- (2) The person must pay the levy (including any goods and services tax payable on it) to the New Zealand Customs Service at the same time as duty under the Tariff Act 1988 or excise-equivalent duty would be paid on the goods if any were payable.

Section 229: inserted, on 1 January 2013, by section 100 of the Climate Change Response (Emissions Trading and Other Matters) Amendment Act 2012 (2012 No 89).

230 Levies are debt due to the Crown

- (1) A levy that becomes payable is a debt due to the Crown.
- (2) The EPA may, on behalf of the Crown, recover the debt in a court of competent jurisdiction.
- (3) This section does not limit—
 - (a) the power of the Customs to recover an unpaid amount of goods levy as a debt under the Customs and Excise Act 1996; or
 - (b) the power of the Registrar of Motor Vehicles to recover an unpaid amount of motor vehicle levy as a debt under the Land Transport Act 1998.

Section 230: inserted, on 1 January 2013, by section 100 of the Climate Change Response (Emissions Trading and Other Matters) Amendment Act 2012 (2012 No 89).

231 Penalties for failure to pay levy

- (1) If an importer fails to pay the levy by the date on which section 229 requires payment (the **due date**), the debt is increased by adding a penalty.
- (2) The penalty is to be calculated in accordance with section 87 of the Customs and Excise Act 1996 as if—
 - (a) a reference to a duty were a reference to a levy; and
 - (b) a reference to additional duty were a reference to a penalty.

Section 231: inserted, on 1 January 2013, by section 100 of the Climate Change Response (Emissions Trading and Other Matters) Amendment Act 2012 (2012 No 89).

232 Application of provisions of Customs and Excise Act 1996

- (1) The provisions of the Customs and Excise Act 1996 that apply to the collection of duties apply, with all necessary modifications, to the collection of the goods levy under this Act as if the levy were a duty to which that Act applies.
- (2) However,—
 - (a) section 103(3) of that Act applies as if the reference to dutiable goods were a reference to leviable goods;
 - (b) section 103(4) and (5) of that Act apply as if they did not refer to the owner of the goods or the licensee of a Customs controlled area.
- (3) Despite subsection (1), the following provisions of the Customs and Excise Act 1996 do not apply to the collection of the levy:
 - (a) section 104;
 - (b) section 108;
 - (c) section 112;
 - (d) section 114;
 - (e) section 117.

Heading: inserted, on 1 January 2013, by section 100 of the Climate Change Response (Emissions Trading and Other Matters) Amendment Act 2012 (2012 No 89).

233 Rate of synthetic greenhouse gas levy

- (1) The levy rate that applies to a leviable motor vehicle, a class of leviable motor vehicle, or an item or a class of leviable goods in a levy year must be calculated in accordance with the following formula:

$$R = A \times B \times GWP$$

where—

A is the amount of synthetic greenhouse gas contained in the class of levi-
able motor vehicle or levi-able goods, or the item of levi-able goods

B is the price of carbon specified under subsection (4)(b)

GWP is the global warming potential specified in regulations for the specified
synthetic greenhouse gas

R is the rate of the levy.

- (2) In this section, **amount** means the weight or any other unit of measurement of a synthetic greenhouse gas prescribed for the purpose of this section in regulations made under section 246(1)(c) or (e).
- (3) For the purpose of item A, the amount of synthetic greenhouse gas contained in a levi-able motor vehicle or levi-able good is—
 - (a) the amount specified by regulations for that class of levi-able motor vehicle or levi-able good, or for an item of levi-able good; and
 - (b) if no amount is specified by regulations, the actual amount contained in the levi-able motor vehicle or levi-able good.
- (4) For the purpose of item B, the Governor-General may, by Order in Council made on the recommendation of the Minister,—
 - (a) prescribe the methodology for specifying the price of carbon; and
 - (b) specify the price of carbon by applying the methodology.
- (5) Regulations made under subsection (4)(a)—
 - (a) must be made in accordance with the process set out in section 247; and
 - (b) may not come into force earlier than 3 months after the date of their notification in the *Gazette*.
- (6) Before making a recommendation under subsection (4), the Minister must take into account the following matters:
 - (a) the price of the units used to calculate revenue from the greenhouse gas emissions trading scheme in the Crown annual financial statements over the preceding 12 months; and
 - (b) the price of New Zealand units sold by auction under section 6A over the preceding 12 months; and
 - (c) any changes to the operation of the greenhouse gas emissions trading scheme that have affected the price of the units surrendered under that scheme, or that may do so before the end of the next levy year.

Section 233: inserted, on 1 January 2013, by section 100 of the Climate Change Response (Emissions Trading and Other Matters) Amendment Act 2012 (2012 No 89).

234 Transitional provision for synthetic greenhouse gas levy

- (1) Despite section 233(5), the requirements of that subsection do not apply to regulations made under section 233(4) that apply during the period 1 July 2013 to 31 December 2013 (the **transitional period**).
- (2) However, the methodology prescribed by regulations made under section 233(4)(a) in the transitional period ceases to apply on and from the end of the transitional period.

Section 234: inserted, on 1 January 2013, by section 100 of the Climate Change Response (Emissions Trading and Other Matters) Amendment Act 2012 (2012 No 89).

235 Temporary suspension of levy set by section 233

- (1) This section applies to suspend temporarily the operation of section 233 in relation to the calculation of the levy.
- (2) Despite anything in section 233, the operation of that section is suspended for the period—
 - (a) beginning on the date on which this section comes into force; and
 - (b) ending on the close of the date specified for the purpose of this section as the closure date by the Governor-General by Order in Council made on the recommendation of the Minister.
- (3) Instead, subsection (4) applies to the calculation of the levy rate while the operation of section 233 is suspended.
- (4) The levy rate that applies to a class of leviable motor vehicles or an item or a class of leviable goods in a levy year must be calculated in accordance with the following formula:

$$R = A \times B \times GWP \times 0.5$$

where—

- (a) items A, B, GWP, and R have the same meanings as in section 233(1); and
 - (b) section 233(4) applies to the calculation of item B.
- (5) Before the Minister may make a recommendation under subsection (2)(b), the Minister must be satisfied that section 63A no longer applies to any person and no person is liable to surrender, or is restricted to surrendering, 1 unit for each 2 whole tonnes of emissions.
 - (6) This section is repealed on the day after the closure date specified in an Order in Council made under subsection (2)(b).
 - (7) An Order in Council made under subsection (2)(b) may be revoked, replaced, or amended at any time before the closure date specified in that order.

Section 235: inserted, on 1 January 2013, by section 100 of the Climate Change Response (Emissions Trading and Other Matters) Amendment Act 2012 (2012 No 89).

236 Maximum price of carbon for purpose of levy calculation

- (1) This section applies to the calculation of item B of the formula set out in section 233(1) or 235(4) (as applicable) for the period—
 - (a) beginning on the date on which this section comes into force; and
 - (b) ending on the close of the date specified for the purpose of this section as the closure date by the Governor-General by Order in Council made on the recommendation of the Minister.
- (2) If, during the period specified in subsection (1), the application of the methodology prescribed under section 233(4)(a) results in a carbon price that is higher than \$25, the regulations made under section 233(4)(b) must prescribe a carbon price of \$25.
- (3) Before the Minister may make a recommendation under subsection (1)(b), the Minister must be satisfied that a person does not meet his or her obligation to surrender, repay, or reimburse units by paying \$25 for each unit in accordance with section 178A.
- (4) This section overrides sections 233 and 235.

Section 236: inserted, on 1 January 2013, by section 100 of the Climate Change Response (Emissions Trading and Other Matters) Amendment Act 2012 (2012 No 89).

- (1) A levy rate applies for 1 levy year.
- (2) Subsection (1) is subject to section 238.
- (3) If no rate is set before the beginning of a levy year, the levy rate for that year is the same as it was for the preceding levy year.
- (4) However, if a levy rate is set for a levy year after the beginning of the levy year, the new levy rate applies from the beginning of the quarter of the levy year following the date on which the levy rate was set until the close of the levy year.
- (5) For the purposes of this section and section 241,—

- (a) a levy rate is set on the date on which the regulations prescribing the rate come into force:
- (b) the quarters of a levy year are—
 - (i) 1 January to 31 March:
 - (ii) 1 April to 30 June:
 - (iii) 1 July to 30 September:

The Parties to this Convention.

Acknowledging that change in the Earth's climate and its adverse effects are a common concern of humankind,

Concerned that human activities have been substantially increasing the atmospheric concentrations of greenhouse gases, that these increases enhance the natural greenhouse effect, and that this will result on average in an additional warming of the Earth's surface and atmosphere and may adversely affect natural ecosystems and humankind,

Noting that the largest share of historical and current global emissions of greenhouse gases has originated in developed countries, that per capita emissions in developing countries are still relatively low and that the share of global emissions originating in developing countries will grow to meet their social and development needs,

Aware of the role and importance in terrestrial and marine ecosystems of sinks and reservoirs of greenhouse gases,

Noting that there are many uncertainties in predictions of climate change, particularly with regard to the timing, magnitude and regional patterns thereof,

Acknowledging that the global nature of climate change calls for the widest possible cooperation by all countries and their participation in an effective and appropriate international response, in accordance with their common but differentiated responsibilities and respective capabilities and their social and economic conditions,

Recalling the pertinent provisions of the Declaration of the United Nations Conference on the Human Environment, adopted at Stockholm on 16 June 1972,

Recalling also that States have, in accordance with the Charter of the United Nations and the principles of international law, the sovereign right to exploit their own resources pursuant to their own environmental and developmental policies, and the responsibility to ensure that activities within their jurisdiction or control do not cause damage to the environment of other States or of areas beyond the limits of national jurisdiction,

Reaffirming the principle of sovereignty of States in international cooperation to address climate change,

Recognizing that States should enact effective environmental legislation, that environmental standards, management objectives and priorities should reflect the environmental and developmental context to which they apply, and that standards applied by some countries may be inappropriate and of unwarranted economic and social cost to other countries, in particular developing countries,

Recalling the provisions of General Assembly resolution 44/228 of 22 December 1989 on the United Nations Conference on Environment and Development, and resolutions 43/53 of 6 December 1988, 44/207 of 22 December 1989, 45/212 of 21 December 1990 and 46/169 of 19 December 1991 on protection of global climate for present and future generations of mankind,

Recalling also the provisions of General Assembly resolution 44/206 of 22 December 1989 on the possible adverse effects of sea-level rise on islands and coastal areas, par-

ticularly low-lying coastal areas and the pertinent provisions of General Assembly resolution 44/172 of 19 December 1989 on the implementation of the Plan of Action to Combat Desertification,

Recalling further the Vienna Convention for the Protection of the Ozone Layer, 1985, and the Montreal Protocol on Substances that Deplete the Ozone Layer, 1987, as adjusted and amended on 29 June 1990,

Noting the Ministerial Declaration of the Second World Climate Conference adopted on 7 November 1990,

Conscious of the valuable analytical work being conducted by many States on climate change and of the important contributions of the World Meteorological Organization, the United Nations Environment Programme and other organs, organizations and bodies of the United Nations system, as well as other international and intergovernmental bodies, to the exchange of results of scientific research and the coordination of research,

Recognizing that steps required to understand and address climate change will be environmentally, socially and economically most effective if they are based on relevant scientific, technical and economic considerations and continually re-evaluated in the light of new findings in these areas,

Recognizing that various actions to address climate change can be justified economically in their own right and can also help in solving other environmental problems,

Recognizing also the need for developed countries to take immediate action in a flexible manner on the basis of clear priorities, as a first step towards comprehensive response strategies at the global, national and, where agreed, regional levels that take into account all greenhouse gases, with due consideration of their relative contributions to the enhancement of the greenhouse effect,

Recognizing further that low-lying and other small island countries, countries with low-lying coastal, arid and semi-arid areas or areas liable to floods, drought and desertification, and developing countries with fragile mountainous ecosystems are particularly vulnerable to the adverse effects of climate change,

Recognizing the special difficulties of those countries, especially developing countries, whose economies are particularly dependent on fossil fuel production, use and exportation, as a consequence of action taken on limiting greenhouse gas emissions,

Affirming that responses to climate change should be coordinated with social and economic development in an integrated manner with a view to avoiding adverse impacts on the latter, taking into full account the legitimate priority needs of developing countries for the achievement of sustained economic growth and the eradication of poverty,

Recognizing that all countries, especially developing countries, need access to resources required to achieve sustainable social and economic development and that, in order for developing countries to progress towards that goal, their energy consumption will need to grow taking into account the possibilities for achieving greater energy efficiency and for controlling greenhouse gas emissions in general, including

through the application of new technologies on terms which make such an application economically and socially beneficial,

Determined to protect the climate system for present and future generations,

Have agreed as follows:

Article 1

Definitions¹

For the purposes of this Convention:

1. “Adverse effects of climate change” means changes in the physical environment or biota resulting from climate change which have significant deleterious effects on the composition, resilience or productivity of natural and managed ecosystems or on the operation of socio-economic systems or on human health and welfare.
2. “Climate change” means a change of climate which is attributed directly or indirectly to human activity that alters the composition of the global atmosphere and which is in addition to natural climate variability observed over comparable time periods.
3. “Climate system” means the totality of the atmosphere, hydrosphere, biosphere and geosphere and their interactions.
4. “Emissions” means the release of greenhouse gases and/or their precursors into the atmosphere over a specified area and period of time.
5. “Greenhouse gases” means those gaseous constituents of the atmosphere, both natural and anthropogenic, that absorb and re-emit infrared radiation.
6. “Regional economic integration organization” means an organization constituted by sovereign States of a given region which has competence in respect of matters governed by this Convention or its protocols and has been duly authorized, in accordance with its internal procedures, to sign, ratify, accept, approve or accede to the instruments concerned.
7. “Reservoir” means a component or components of the climate system where a greenhouse gas or a precursor of a greenhouse gas is stored.
8. “Sink” means any process, activity or mechanism which removes a greenhouse gas, an aerosol or a precursor of a greenhouse gas from the atmosphere.
9. “Source” means any process or activity which releases a greenhouse gas, an aerosol or a precursor of a greenhouse gas into the atmosphere.

Article 2

Objective

The ultimate objective of this Convention and any related legal instruments that the Conference of the Parties may adopt is to achieve, in accordance with the relevant provisions of the Convention, stabilization of greenhouse gas concentrations in the atmosphere at a level that would prevent dangerous anthropogenic interference with the climate system. Such a level should be achieved within a time-frame sufficient to allow ecosystems to adapt naturally to climate change, to ensure that food production is not threatened and to enable economic development to proceed in a sustainable manner.

Article 3

Principles

In their actions to achieve the objective of the Convention and to implement its provisions, the Parties shall be guided, *inter alia*, by the following:

1. The Parties should protect the climate system for the benefit of present and future generations of humankind, on the basis of equity and in accordance with their common but differentiated responsibilities and respective capabilities. Accordingly, the developed country Parties should take the lead in combating climate change and the adverse effects thereof.
2. The specific needs and special circumstances of developing country Parties, especially those that are particularly vulnerable to the adverse effects of climate change, and of those Parties, especially developing country Parties, that would have to bear a disproportionate or abnormal burden under the Convention, should be given full consideration.
3. The Parties should take precautionary measures to anticipate, prevent or minimize the causes of climate change and mitigate its adverse effects. Where there are threats of serious or irreversible damage, lack of full scientific certainty should not be used as a reason for postponing such measures, taking into account that policies and measures to deal with climate change should be cost-effective so as to ensure global benefits at the lowest possible cost. To achieve this, such policies and measures should take into account different socio-economic contexts, be comprehensive, cover all relevant sources, sinks and reservoirs of greenhouse gases and adaptation, and comprise all economic sectors. Efforts to address climate change may be carried out cooperatively by interested Parties.
4. The Parties have a right to, and should, promote sustainable development. Policies and measures to protect the climate system against human-induced change should be appropriate for the specific conditions of each Party and should be integrated with national development programmes, taking into account that economic development is essential for adopting measures to address climate change.

5. The Parties should cooperate to promote a supportive and open international economic system that would lead to sustainable economic growth and development in all Parties, particularly developing country Parties, thus enabling them better to address the problems of climate change. Measures taken to combat climate change, including unilateral ones, should not constitute a means of arbitrary or unjustifiable discrimination or a disguised restriction on international trade.

Article 4

Commitments

1. All Parties, taking into account their common but differentiated responsibilities and their specific national and regional development priorities, objectives and circumstances, shall:
 - (a) Develop, periodically update, publish and make available to the Conference of the Parties, in accordance with Article 12, national inventories of anthropogenic emissions by sources and removals by sinks of all greenhouse gases not controlled by the Montreal Protocol, using comparable methodologies to be agreed upon by the Conference of the Parties;
 - (b) Formulate, implement, publish and regularly update national and, where appropriate, regional programmes containing measures to mitigate climate change by addressing anthropogenic emissions by sources and removals by sinks of all greenhouse gases not controlled by the Montreal Protocol, and measures to facilitate adequate adaptation to climate change;
 - (c) Promote and cooperate in the development, application and diffusion, including transfer, of technologies, practices and processes that control, reduce or prevent anthropogenic emissions of greenhouse gases not controlled by the Montreal Protocol in all relevant sectors, including the energy, transport, industry, agriculture, forestry and waste management sectors;
 - (d) Promote sustainable management, and promote and cooperate in the conservation and enhancement, as appropriate, of sinks and reservoirs of all greenhouse gases not controlled by the Montreal Protocol, including biomass, forests and oceans as well as other terrestrial, coastal and marine ecosystems;
 - (e) Cooperate in preparing for adaptation to the impacts of climate change; develop and elaborate appropriate and integrated plans for coastal zone management, water resources and agriculture, and for the protection and rehabilitation of areas, particularly in Africa, affected by drought and desertification, as well as floods;
 - (f) Take climate change considerations into account, to the extent feasible, in their relevant social, economic and environmental policies and ac-

- tions, and employ appropriate methods, for example impact assessments, formulated and determined nationally, with a view to minimizing adverse effects on the economy, on public health and on the quality of the environment, of projects or measures undertaken by them to mitigate or adapt to climate change;
- (g) Promote and cooperate in scientific, technological, technical, socio-economic and other research, systematic observation and development of data archives related to the climate system and intended to further the understanding and to reduce or eliminate the remaining uncertainties regarding the causes, effects, magnitude and timing of climate change and the economic and social consequences of various response strategies;
 - (h) Promote and cooperate in the full, open and prompt exchange of relevant scientific, technological, technical, socio-economic and legal information related to the climate system and climate change, and to the economic and social consequences of various response strategies;
 - (i) Promote and cooperate in education, training and public awareness related to climate change and encourage the widest participation in this process, including that of non-governmental organizations; and
 - (j) Communicate to the Conference of the Parties information related to implementation, in accordance with Article 12.
2. The developed country Parties and other Parties included in Annex I commit themselves specifically as provided for in the following:
- (a) Each of these Parties shall adopt national² policies and take corresponding measures on the mitigation of climate change, by limiting its anthropogenic emissions of greenhouse gases and protecting and enhancing its greenhouse gas sinks and reservoirs. These policies and measures will demonstrate that developed countries are taking the lead in modifying longer-term trends in anthropogenic emissions consistent with the objective of the Convention, recognizing that the return by the end of the present decade to earlier levels of anthropogenic emissions of carbon dioxide and other greenhouse gases not controlled by the Montreal Protocol would contribute to such modification, and taking into account the differences in these Parties' starting points and approaches, economic structures and resource bases, the need to maintain strong and sustainable economic growth, available technologies and other individual circumstances, as well as the need for equitable and appropriate contributions by each of these Parties to the global effort regarding that objective. These Parties may implement such policies and measures jointly with other Parties and may assist other Parties in contributing to the ach-

² This includes policies and measures adopted by regional economic integration organizations.

achievement of the objective of the Convention and, in particular, that of this subparagraph;

- (b) In order to promote progress to this end, each of these Parties shall communicate, within six months of the entry into force of the Convention for it and periodically thereafter, and in accordance with Article 12, detailed information on its policies and measures referred to in subparagraph (a) above, as well as on its resulting projected anthropogenic emissions by sources and removals by sinks of greenhouse gases not controlled by the Montreal Protocol for the period referred to in subparagraph (a), with the aim of returning individually or jointly to their 1990 levels these anthropogenic emissions of carbon dioxide and other greenhouse gases not controlled by the Montreal Protocol. This information will be reviewed by the Conference of the Parties, at its first session and periodically thereafter, in accordance with Article 7;
- (c) Calculations of emissions by sources and removals by sinks of greenhouse gases for the purposes of subparagraph (b) above should take into account the best available scientific knowledge, including of the effective capacity of sinks and the respective contributions of such gases to climate change. The Conference of the Parties shall consider and agree on methodologies for these calculations at its first session and review them regularly thereafter;
- (d) The Conference of the Parties shall, at its first session, review the adequacy of subparagraphs (a) and (b) above. Such review shall be carried out in the light of the best available scientific information and assessment on climate change and its impacts, as well as relevant technical, social and economic information. Based on this review, the Conference of the Parties shall take appropriate action, which may include the adoption of amendments to the commitments in subparagraphs (a) and (b) above. The Conference of the Parties, at its first session, shall also take decisions regarding criteria for joint implementation as indicated in subparagraph (a) above. A second review of subparagraphs (a) and (b) shall take place not later than 31 December 1998, and thereafter at regular intervals determined by the Conference of the Parties, until the objective of the Convention is met;
- (e) Each of these Parties shall:
 - (i) Coordinate as appropriate with other such Parties, relevant economic and administrative instruments developed to achieve the objective of the Convention; and
 - (ii) Identify and periodically review its own policies and practices which encourage activities that lead to greater levels of anthropogenic emissions of greenhouse gases not controlled by the Montreal Protocol than would otherwise occur;

- (f) The Conference of the Parties shall review, not later than 31 December 1998, available information with a view to taking decisions regarding such amendments to the lists in Annexes I and II as may be appropriate, with the approval of the Party concerned;
 - (g) Any Party not included in Annex I may, in its instrument of ratification, acceptance, approval or accession, or at any time thereafter, notify the Depositary that it intends to be bound by subparagraphs (a) and (b) above. The Depositary shall inform the other signatories and Parties of any such notification.
- 3. The developed country Parties and other developed Parties included in Annex II shall provide new and additional financial resources to meet the agreed full costs incurred by developing country Parties in complying with their obligations under Article 12, paragraph 1. They shall also provide such financial resources, including for the transfer of technology, needed by the developing country Parties to meet the agreed full incremental costs of implementing measures that are covered by paragraph 1 of this Article and that are agreed between a developing country Party and the international entity or entities referred to in Article 11, in accordance with that Article. The implementation of these commitments shall take into account the need for adequacy and predictability in the flow of funds and the importance of appropriate burden sharing among the developed country Parties.
- 4. The developed country Parties and other developed Parties included in Annex II shall also assist the developing country Parties that are particularly vulnerable to the adverse effects of climate change in meeting costs of adaptation to those adverse effects.
- 5. The developed country Parties and other developed Parties included in Annex II shall take all practicable steps to promote, facilitate and finance, as appropriate, the transfer of, or access to, environmentally sound technologies and know-how to other Parties, particularly developing country Parties, to enable them to implement the provisions of the Convention. In this process, the developed country Parties shall support the development and enhancement of endogenous capacities and technologies of developing country Parties. Other Parties and organizations in a position to do so may also assist in facilitating the transfer of such technologies.
- 6. In the implementation of their commitments under paragraph 2 above, a certain degree of flexibility shall be allowed by the Conference of the Parties to the Parties included in Annex I undergoing the process of transition to a market economy, in order to enhance the ability of these Parties to address climate change, including with regard to the historical level of anthropogenic emissions of greenhouse gases not controlled by the Montreal Protocol chosen as a reference.
- 7. The extent to which developing country Parties will effectively implement their commitments under the Convention will depend on the effective implementa-

tion by developed country Parties of their commitments under the Convention related to financial resources and transfer of technology and will take fully into account that economic and social development and poverty eradication are the first and overriding priorities of the developing country Parties.

8. In the implementation of the commitments in this Article, the Parties shall give full consideration to what actions are necessary under the Convention, including actions related to funding, insurance and the transfer of technology, to meet the specific needs and concerns of developing country Parties arising from the adverse effects of climate change and/or the impact of the implementation of response measures, especially on:
 - (a) Small island countries;
 - (b) Countries with low-lying coastal areas;
 - (c) Countries with arid and semi-arid areas, forested areas and areas liable to forest decay;
 - (d) Countries with areas prone to natural disasters;
 - (e) Countries with areas liable to drought and desertification;
 - (f) Countries with areas of high urban atmospheric pollution;
 - (g) Countries with areas with fragile ecosystems, including mountainous ecosystems;
 - (h) Countries whose economies are highly dependent on income generated from the production, processing and export, and/or on consumption of fossil fuels and associated energy-intensive products; and
 - (i) Land-locked and transit countries.

Further, the Conference of the Parties may take actions, as appropriate, with respect to this paragraph.

9. The Parties shall take full account of the specific needs and special situations of the least developed countries in their actions with regard to funding and transfer of technology.
10. The Parties shall, in accordance with Article 10, take into consideration in the implementation of the commitments of the Convention the situation of Parties, particularly developing country Parties, with economies that are vulnerable to the adverse effects of the implementation of measures to respond to climate change. This applies notably to Parties with economies that are highly dependent on income generated from the production, processing and export, and/or consumption of fossil fuels and associated energy-intensive products and/or the use of fossil fuels for which such Parties have serious difficulties in switching to alternatives.

Article 5

Research and systematic observation

In carrying out their commitments under Article 4, paragraph 1(g), the Parties shall:

- (a) Support and further develop, as appropriate, international and intergovernmental programmes and networks or organizations aimed at defining, conducting, assessing and financing research, data collection and systematic observation, taking into account the need to minimize duplication of effort;
- (b) Support international and intergovernmental efforts to strengthen systematic observation and national scientific and technical research capacities and capabilities, particularly in developing countries, and to promote access to, and the exchange of, data and analyses thereof obtained from areas beyond national jurisdiction; and
- (c) Take into account the particular concerns and needs of developing countries and cooperate in improving their endogenous capacities and capabilities to participate in the efforts referred to in subparagraphs (a) and (b) above.

Article 12

Communication of information related to implementation

- 1. In accordance with Article 4, paragraph 1, each Party shall communicate to the Conference of the Parties, through the secretariat, the following elements of information:
 - (a) A national inventory of anthropogenic emissions by sources and removals by sinks of all greenhouse gases not controlled by the Montreal Protocol, to the extent its capacities permit, using comparable methodologies to be promoted and agreed upon by the Conference of the Parties;
 - (b) A general description of steps taken or envisaged by the Party to implement the Convention; and
 - (c) Any other information that the Party considers relevant to the achievement of the objective of the Convention and suitable for inclusion in its communication, including, if feasible, material relevant for calculations of global emission trends.
- 2. Each developed country Party and each other Party included in Annex I shall incorporate in its communication the following elements of information:

- (a) A detailed description of the policies and measures that it has adopted to implement its commitment under Article 4, paragraphs 2(a) and 2(b); and
 - (b) A specific estimate of the effects that the policies and measures referred to in subparagraph (a) immediately above will have on anthropogenic emissions by its sources and removals by its sinks of greenhouse gases during the period referred to in Article 4, paragraph 2(a).
3. In addition, each developed country Party and each other developed Party included in Annex II shall incorporate details of measures taken in accordance with Article 4, paragraphs 3, 4 and 5.
4. Developing country Parties may, on a voluntary basis, propose projects for financing, including specific technologies, materials, equipment, techniques or practices that would be needed to implement such projects, along with, if possible, an estimate of all incremental costs, of the reductions of emissions and increments of removals of greenhouse gases, as well as an estimate of the consequent benefits.
5. Each developed country Party and each other Party included in Annex I shall make its initial communication within six months of the entry into force of the Convention for that Party. Each Party not so listed shall make its initial communication within three years of the entry into force of the Convention for that Party, or of the availability of financial resources in accordance with Article 4, paragraph 3. Parties that are least developed countries may make their initial communication at their discretion. The frequency of subsequent communications by all Parties shall be determined by the Conference of the Parties, taking into account the differentiated timetable set by this paragraph.
6. Information communicated by Parties under this Article shall be transmitted by the secretariat as soon as possible to the Conference of the Parties and to any subsidiary bodies concerned. If necessary, the procedures for the communication of information may be further considered by the Conference of the Parties.
7. From its first session, the Conference of the Parties shall arrange for the provision to developing country Parties of technical and financial support, on request, in compiling and communicating information under this Article, as well as in identifying the technical and financial needs associated with proposed projects and response measures under Article 4. Such support may be provided by other Parties, by competent international organizations and by the secretariat, as appropriate.
8. Any group of Parties may, subject to guidelines adopted by the Conference of the Parties, and to prior notification to the Conference of the Parties, make a joint communication in fulfilment of their obligations under this Article, provided that such a communication includes information on the fulfilment by each of these Parties of its individual obligations under the Convention.

9. Information received by the secretariat that is designated by a Party as confidential, in accordance with criteria to be established by the Conference of the Parties, shall be aggregated by the secretariat to protect its confidentiality before being made available to any of the bodies involved in the communication and review of information.
10. Subject to paragraph 9 above, and without prejudice to the ability of any Party to make public its communication at any time, the secretariat shall make communications by Parties under this Article publicly available at the time they are submitted to the Conference of the Parties.

Article 13

Resolution of questions regarding implementation

The Conference of the Parties shall, at its first session, consider the establishment of a multilateral consultative process, available to Parties on their request, for the resolution of questions regarding the implementation of the Convention.

Article 14

Settlement of disputes

1. In the event of a dispute between any two or more Parties concerning the interpretation or application of the Convention, the Parties concerned shall seek a settlement of the dispute through negotiation or any other peaceful means of their own choice.
2. When ratifying, accepting, approving or acceding to the Convention, or at any time thereafter, a Party which is not a regional economic integration organization may declare in a written instrument submitted to the Depositary that, in respect of any dispute concerning the interpretation or application of the Convention, it recognizes as compulsory *ipso facto* and without special agreement, in relation to any Party accepting the same obligation:
 - (a) Submission of the dispute to the International Court of Justice, and/or
 - (b) Arbitration in accordance with procedures to be adopted by the Conference of the Parties as soon as practicable, in an annex on arbitration.

A Party which is a regional economic integration organization may make a declaration with like effect in relation to arbitration in accordance with the procedures referred to in subparagraph (b) above.

3. A declaration made under paragraph 2 above shall remain in force until it expires in accordance with its terms or until three months after written notice of its revocation has been deposited with the Depositary.
4. A new declaration, a notice of revocation or the expiry of a declaration shall not in any way affect proceedings pending before the International Court of Justice or the arbitral tribunal, unless the parties to the dispute otherwise agree.

5. Subject to the operation of paragraph 2 above, if after twelve months following notification by one Party to another that a dispute exists between them, the Parties concerned have not been able to settle their dispute through the means mentioned in paragraph 1 above, the dispute shall be submitted, at the request of any of the parties to the dispute, to conciliation.
6. A conciliation commission shall be created upon the request of one of the parties to the dispute. The commission shall be composed of an equal number of members appointed by each party concerned and a chairman chosen jointly by the members appointed by each party. The commission shall render a recommendatory award, which the parties shall consider in good faith.
7. Additional procedures relating to conciliation shall be adopted by the Conference of the Parties, as soon as practicable, in an annex on conciliation.
8. The provisions of this Article shall apply to any related legal instrument which the Conference of the Parties may adopt, unless the instrument provides otherwise.

Article 15

Amendments to the Convention

1. Any Party may propose amendments to the Convention.
2. Amendments to the Convention shall be adopted at an ordinary session of the Conference of the Parties. The text of any proposed amendment to the Convention shall be communicated to the Parties by the secretariat at least six months before the meeting at which it is proposed for adoption. The secretariat shall also communicate proposed amendments to the signatories to the Convention and, for information, to the Depositary.
3. The Parties shall make every effort to reach agreement on any proposed amendment to the Convention by consensus. If all efforts at consensus have been exhausted, and no agreement reached, the amendment shall as a last resort be adopted by a three-fourths majority vote of the Parties present and voting at the meeting. The adopted amendment shall be communicated by the secretariat to the Depositary, who shall circulate it to all Parties for their acceptance.
4. Instruments of acceptance in respect of an amendment shall be deposited with the Depositary. An amendment adopted in accordance with paragraph 3 above shall enter into force for those Parties having accepted it on the ninetieth day after the date of receipt by the Depositary of an instrument of acceptance by at least three fourths of the Parties to the Convention.
5. The amendment shall enter into force for any other Party on the ninetieth day after the date on which that Party deposits with the Depositary its instrument of acceptance of the said amendment.
6. For the purposes of this Article, “Parties present and voting” means Parties present and casting an affirmative or negative vote.

Article 16

Adoption and amendment of annexes to the Convention

1. Annexes to the Convention shall form an integral part thereof and, unless otherwise expressly provided, a reference to the Convention constitutes at the same time a reference to any annexes thereto. Without prejudice to the provisions of Article 14, paragraphs 2(b) and 7, such annexes shall be restricted to lists, forms and any other material of a descriptive nature that is of a scientific, technical, procedural or administrative character.
2. Annexes to the Convention shall be proposed and adopted in accordance with the procedure set forth in Article 15, paragraphs 2, 3 and 4.
3. An annex that has been adopted in accordance with paragraph 2 above shall enter into force for all Parties to the Convention six months after the date of the communication by the Depositary to such Parties of the adoption of the annex, except for those Parties that have notified the Depositary, in writing, within that period of their non-acceptance of the annex. The annex shall enter into force for Parties which withdraw their notification of non-acceptance on the ninetieth day after the date on which withdrawal of such notification has been received by the Depositary.
4. The proposal, adoption and entry into force of amendments to annexes to the Convention shall be subject to the same procedure as that for the proposal, adoption and entry into force of annexes to the Convention in accordance with paragraphs 2 and 3 above.
5. If the adoption of an annex or an amendment to an annex involves an amendment to the Convention, that annex or amendment to an annex shall not enter into force until such time as the amendment to the Convention enters into force.

Article 17

Protocols

1. The Conference of the Parties may, at any ordinary session, adopt protocols to the Convention.
2. The text of any proposed protocol shall be communicated to the Parties by the secretariat at least six months before such a session.
3. The requirements for the entry into force of any protocol shall be established by that instrument.
4. Only Parties to the Convention may be Parties to a protocol.
5. Decisions under any protocol shall be taken only by the Parties to the protocol concerned.

Article 18

Right to vote

1. Each Party to the Convention shall have one vote, except as provided for in paragraph 2 below.
2. Regional economic integration organizations, in matters within their competence, shall exercise their right to vote with a number of votes equal to the number of their member States that are Parties to the Convention. Such an organization shall not exercise its right to vote if any of its member States exercises its right, and vice versa.

Article 19

Depositary

The Secretary-General of the United Nations shall be the Depositary of the Convention and of protocols adopted in accordance with Article 17.

Article 20

Signature

This Convention shall be open for signature by States Members of the United Nations or of any of its specialized agencies or that are Parties to the Statute of the International Court of Justice and by regional economic integration organizations at Rio de Janeiro, during the United Nations Conference on Environment and Development, and thereafter at United Nations Headquarters in New York from 20 June 1992 to 19 June 1993.

Article 21

Interim arrangements

1. The secretariat functions referred to in Article 8 will be carried out on an interim basis by the secretariat established by the General Assembly of the United Nations in its resolution 45/212 of 21 December 1990, until the completion of the first session of the Conference of the Parties.
2. The head of the interim secretariat referred to in paragraph 1 above will cooperate closely with the Intergovernmental Panel on Climate Change to ensure that the Panel can respond to the need for objective scientific and technical advice. Other relevant scientific bodies could also be consulted.
3. The Global Environment Facility of the United Nations Development Programme, the United Nations Environment Programme and the International Bank for Reconstruction and Development shall be the international entity entrusted with the operation of the financial mechanism referred to in Article 11 on an interim basis. In this connection, the Global Environment Facility should

be appropriately restructured and its membership made universal to enable it to fulfil the requirements of Article 11.

Article 22

Ratification, acceptance, approval or accession

1. The Convention shall be subject to ratification, acceptance, approval or accession by States and by regional economic integration organizations. It shall be open for accession from the day after the date on which the Convention is closed for signature. Instruments of ratification, acceptance, approval or accession shall be deposited with the Depositary.
2. Any regional economic integration organization which becomes a Party to the Convention without any of its member States being a Party shall be bound by all the obligations under the Convention. In the case of such organizations, one or more of whose member States is a Party to the Convention, the organization and its member States shall decide on their respective responsibilities for the performance of their obligations under the Convention. In such cases, the organization and the member States shall not be entitled to exercise rights under the Convention concurrently.
3. In their instruments of ratification, acceptance, approval or accession, regional economic integration organizations shall declare the extent of their competence with respect to the matters governed by the Convention. These organizations shall also inform the Depositary, who shall in turn inform the Parties, of any substantial modification in the extent of their competence.

Article 23

Entry into force

1. The Convention shall enter into force on the ninetieth day after the date of deposit of the fiftieth instrument of ratification, acceptance, approval or accession.
2. For each State or regional economic integration organization that ratifies, accepts or approves the Convention or accedes thereto after the deposit of the fiftieth instrument of ratification, acceptance, approval or accession, the Convention shall enter into force on the ninetieth day after the date of deposit by such State or regional economic integration organization of its instrument of ratification, acceptance, approval or accession.
3. For the purposes of paragraphs 1 and 2 above, any instrument deposited by a regional economic integration organization shall not be counted as additional to those deposited by States members of the organization.

Article 24

Reservations

No reservations may be made to the Convention.

Article 25

Withdrawal

1. At any time after three years from the date on which the Convention has entered into force for a Party, that Party may withdraw from the Convention by giving written notification to the Depositary.
2. Any such withdrawal shall take effect upon expiry of one year from the date of receipt by the Depositary of the notification of withdrawal, or on such later date as may be specified in the notification of withdrawal.
3. Any Party that withdraws from the Convention shall be considered as also having withdrawn from any protocol to which it is a Party.

The Parties to this Protocol,

Being Parties to the United Nations Framework Convention on Climate Change, hereinafter referred to as “the Convention”,

In pursuit of the ultimate objective of the Convention as stated in its Article 2,

Recalling the provisions of the Convention,

Being guided by Article 3 of the Convention,

Pursuant to the Berlin Mandate adopted by decision 1/CP.1 of the Conference of the Parties to the Convention at its first session,

Have agreed as follows:

Article 1

For the purposes of this Protocol, the definitions contained in Article 1 of the Convention shall apply. In addition:

1. “Conference of the Parties” means the Conference of the Parties to the Convention.
2. “Convention” means the United Nations Framework Convention on Climate Change, adopted in New York on 9 May 1992.
3. “Intergovernmental Panel on Climate Change” means the Intergovernmental Panel on Climate Change established in 1988 jointly by the World Meteorological Organization and the United Nations Environment Programme.
4. “Montreal Protocol” means the Montreal Protocol on Substances that Deplete the Ozone Layer, adopted in Montreal on 16 September 1987 and as subsequently adjusted and amended.
5. “Parties present and voting” means Parties present and casting an affirmative or negative vote.
6. “Party” means, unless the context otherwise indicates, a Party to this Protocol.
7. “Party included in Annex I” means a Party included in Annex I to the Convention, as may be amended, or a Party which has made a notification under Article 4, paragraph 2(g), of the Convention.

Article 2

1. Each Party included in Annex I, in achieving its quantified emission limitation and reduction commitments under Article 3, in order to promote sustainable development, shall:

- (a) Implement and/or further elaborate policies and measures in accordance with its national circumstances, such as:
 - (i) Enhancement of energy efficiency in relevant sectors of the national economy;
 - (ii) Protection and enhancement of sinks and reservoirs of greenhouse gases not controlled by the Montreal Protocol, taking into account its commitments under relevant international environmental agreements; promotion of sustainable forest management practices, afforestation and reforestation;
 - (iii) Promotion of sustainable forms of agriculture in light of climate change considerations;
 - (iv) Research on, and promotion, development and increased use of, new and renewable forms of energy, of carbon dioxide sequestration technologies and of advanced and innovative environmentally sound technologies;
 - (v) Progressive reduction or phasing out of market imperfections, fiscal incentives, tax and duty exemptions and subsidies in all greenhouse gas emitting sectors that run counter to the objective of the Convention and application of market instruments;
 - (vi) Encouragement of appropriate reforms in relevant sectors aimed at promoting policies and measures which limit or reduce emissions of greenhouse gases not controlled by the Montreal Protocol;
 - (vii) Measures to limit and/or reduce emissions of greenhouse gases not controlled by the Montreal Protocol in the transport sector;
 - (viii) Limitation and/or reduction of methane emissions through recovery and use in waste management, as well as in the production, transport and distribution of energy;
 - (b) Cooperate with other such Parties to enhance the individual and combined effectiveness of their policies and measures adopted under this Article, pursuant to Article 4, paragraph 2(e)(i), of the Convention. To this end, these Parties shall take steps to share their experience and exchange information on such policies and measures, including developing ways of improving their comparability, transparency and effectiveness. The Conference of the Parties serving as the meeting of the Parties to this Protocol shall, at its first session or as soon as practicable thereafter, consider ways to facilitate such cooperation, taking into account all relevant information.
2. The Parties included in Annex I shall pursue limitation or reduction of emissions of greenhouse gases not controlled by the Montreal Protocol from aviation and marine bunker fuels, working through the International Civil Aviation Organization and the International Maritime Organization, respectively.

3. The Parties included in Annex I shall strive to implement policies and measures under this Article in such a way as to minimize adverse effects, including the adverse effects of climate change, effects on international trade, and social, environmental and economic impacts on other Parties, especially developing country Parties and in particular those identified in Article 4, paragraphs 8 and 9, of the Convention, taking into account Article 3 of the Convention. The Conference of the Parties serving as the meeting of the Parties to this Protocol may take further action, as appropriate, to promote the implementation of the provisions of this paragraph.
4. The Conference of the Parties serving as the meeting of the Parties to this Protocol, if it decides that it would be beneficial to coordinate any of the policies and measures in paragraph 1(a) above, taking into account different national circumstances and potential effects, shall consider ways and means to elaborate the coordination of such policies and measures.

Article 3

1. The Parties included in Annex I shall, individually or jointly, ensure that their aggregate anthropogenic carbon dioxide equivalent emissions of the greenhouse gases listed in Annex A do not exceed their assigned amounts, calculated pursuant to their quantified emission limitation and reduction commitments inscribed in Annex B and in accordance with the provisions of this Article, with a view to reducing their overall emissions of such gases by at least 5 per cent below 1990 levels in the commitment period 2008 to 2012.
2. Each Party included in Annex I shall, by 2005, have made demonstrable progress in achieving its commitments under this Protocol.
3. The net changes in greenhouse gas emissions by sources and removals by sinks resulting from direct human-induced land-use change and forestry activities, limited to afforestation, reforestation and deforestation since 1990, measured as verifiable changes in carbon stocks in each commitment period, shall be used to meet the commitments under this Article of each Party included in Annex I. The greenhouse gas emissions by sources and removals by sinks associated with those activities shall be reported in a transparent and verifiable manner and reviewed in accordance with Articles 7 and 8.
4. Prior to the first session of the Conference of the Parties serving as the meeting of the Parties to this Protocol, each Party included in Annex I shall provide, for consideration by the Subsidiary Body for Scientific and Technological Advice, data to establish its level of carbon stocks in 1990 and to enable an estimate to be made of its changes in carbon stocks in subsequent years. The Conference of the Parties serving as the meeting of the Parties to this Protocol shall, at its first session or as soon as practicable thereafter, decide upon modalities, rules and guidelines as to how, and which, additional human-induced activities related to changes in greenhouse gas emissions by sources and removals by sinks in the agricultural soils and the land-use change and forestry categories shall be

added to, or subtracted from, the assigned amounts for Parties included in Annex I, taking into account uncertainties, transparency in reporting, verifiability, the methodological work of the Intergovernmental Panel on Climate Change, the advice provided by the Subsidiary Body for Scientific and Technological Advice in accordance with Article 5 and the decisions of the Conference of the Parties. Such a decision shall apply in the second and subsequent commitment periods. A Party may choose to apply such a decision on these additional human-induced activities for its first commitment period, provided that these activities have taken place since 1990.

5. The Parties included in Annex I undergoing the process of transition to a market economy whose base year or period was established pursuant to decision 9/CP.2 of the Conference of the Parties at its second session shall use that base year or period for the implementation of their commitments under this Article. Any other Party included in Annex I undergoing the process of transition to a market economy which has not yet submitted its first national communication under Article 12 of the Convention may also notify the Conference of the Parties serving as the meeting of the Parties to this Protocol that it intends to use an historical base year or period other than 1990 for the implementation of its commitments under this Article. The Conference of the Parties serving as the meeting of the Parties to this Protocol shall decide on the acceptance of such notification.
6. Taking into account Article 4, paragraph 6, of the Convention, in the implementation of their commitments under this Protocol other than those under this Article, a certain degree of flexibility shall be allowed by the Conference of the Parties serving as the meeting of the Parties to this Protocol to the Parties included in Annex I undergoing the process of transition to a market economy.
7. In the first quantified emission limitation and reduction commitment period, from 2008 to 2012, the assigned amount for each Party included in Annex I shall be equal to the percentage inscribed for it in Annex B of its aggregate anthropogenic carbon dioxide equivalent emissions of the greenhouse gases listed in Annex A in 1990, or the base year or period determined in accordance with paragraph 5 above, multiplied by five. Those Parties included in Annex I for whom land-use change and forestry constituted a net source of greenhouse gas emissions in 1990 shall include in their 1990 emissions base year or period the aggregate anthropogenic carbon dioxide equivalent emissions by sources minus removals by sinks in 1990 from land-use change for the purposes of calculating their assigned amount.
8. Any Party included in Annex I may use 1995 as its base year for hydrofluorocarbons, perfluorocarbons and sulphur hexafluoride, for the purposes of the calculation referred to in paragraph 7 above.
9. Commitments for subsequent periods for Parties included in Annex I shall be established in amendments to Annex B to this Protocol, which shall be adopted in accordance with the provisions of Article 21, paragraph 7. The Conference

of the Parties serving as the meeting of the Parties to this Protocol shall initiate the consideration of such commitments at least seven years before the end of the first commitment period referred to in paragraph 1 above.

10. Any emission reduction units, or any part of an assigned amount, which a Party acquires from another Party in accordance with the provisions of Article 6 or of Article 17 shall be added to the assigned amount for the acquiring Party.
11. Any emission reduction units, or any part of an assigned amount, which a Party transfers to another Party in accordance with the provisions of Article 6 or of Article 17 shall be subtracted from the assigned amount for the transferring Party.
12. Any certified emission reductions which a Party acquires from another Party in accordance with the provisions of Article 12 shall be added to the assigned amount for the acquiring Party.
13. If the emissions of a Party included in Annex I in a commitment period are less than its assigned amount under this Article, this difference shall, on request of that Party, be added to the assigned amount for that Party for subsequent commitment periods.
14. Each Party included in Annex I shall strive to implement the commitments mentioned in paragraph 1 above in such a way as to minimize adverse social, environmental and economic impacts on developing country Parties, particularly those identified in Article 4, paragraphs 8 and 9, of the Convention. In line with relevant decisions of the Conference of the Parties on the implementation of those paragraphs, the Conference of the Parties serving as the meeting of the Parties to this Protocol shall, at its first session, consider what actions are necessary to minimize the adverse effects of climate change and/or the impacts of response measures on Parties referred to in those paragraphs. Among the issues to be considered shall be the establishment of funding, insurance and transfer of technology.

Article 4

1. Any Parties included in Annex I that have reached an agreement to fulfil their commitments under Article 3 jointly, shall be deemed to have met those commitments provided that their total combined aggregate anthropogenic carbon dioxide equivalent emissions of the greenhouse gases listed in Annex A do not exceed their assigned amounts calculated pursuant to their quantified emission limitation and reduction commitments inscribed in Annex B and in accordance with the provisions of Article 3. The respective emission level allocated to each of the Parties to the agreement shall be set out in that agreement.
2. The Parties to any such agreement shall notify the secretariat of the terms of the agreement on the date of deposit of their instruments of ratification, acceptance or approval of this Protocol, or accession thereto. The secretariat shall in

turn inform the Parties and signatories to the Convention of the terms of the agreement.

3. Any such agreement shall remain in operation for the duration of the commitment period specified in Article 3, paragraph 7.
4. If Parties acting jointly do so in the framework of, and together with, a regional economic integration organization, any alteration in the composition of the organization after adoption of this Protocol shall not affect existing commitments under this Protocol. Any alteration in the composition of the organization shall only apply for the purposes of those commitments under Article 3 that are adopted subsequent to that alteration.
5. In the event of failure by the Parties to such an agreement to achieve their total combined level of emission reductions, each Party to that agreement shall be responsible for its own level of emissions set out in the agreement.
6. If Parties acting jointly do so in the framework of, and together with, a regional economic integration organization which is itself a Party to this Protocol, each member State of that regional economic integration organization individually, and together with the regional economic integration organization acting in accordance with Article 24, shall, in the event of failure to achieve the total combined level of emission reductions, be responsible for its level of emissions as notified in accordance with this Article.

Article 5

1. Each Party included in Annex I shall have in place, no later than one year prior to the start of the first commitment period, a national system for the estimation of anthropogenic emissions by sources and removals by sinks of all greenhouse gases not controlled by the Montreal Protocol. Guidelines for such national systems, which shall incorporate the methodologies specified in paragraph 2 below, shall be decided upon by the Conference of the Parties serving as the meeting of the Parties to this Protocol at its first session.
2. Methodologies for estimating anthropogenic emissions by sources and removals by sinks of all greenhouse gases not controlled by the Montreal Protocol shall be those accepted by the Intergovernmental Panel on Climate Change and agreed upon by the Conference of the Parties at its third session. Where such methodologies are not used, appropriate adjustments shall be applied according to methodologies agreed upon by the Conference of the Parties serving as the meeting of the Parties to this Protocol at its first session. Based on the work of, *inter alia*, the Intergovernmental Panel on Climate Change and advice provided by the Subsidiary Body for Scientific and Technological Advice, the Conference of the Parties serving as the meeting of the Parties to this Protocol shall regularly review and, as appropriate, revise such methodologies and adjustments, taking fully into account any relevant decisions by the Conference of the Parties. Any revision to methodologies or adjustments shall be used only

for the purposes of ascertaining compliance with commitments under Article 3 in respect of any commitment period adopted subsequent to that revision.

3. The global warming potentials used to calculate the carbon dioxide equivalence of anthropogenic emissions by sources and removals by sinks of greenhouse gases listed in Annex A shall be those accepted by the Intergovernmental Panel on Climate Change and agreed upon by the Conference of the Parties at its third session. Based on the work of, *inter alia*, the Intergovernmental Panel on Climate Change and advice provided by the Subsidiary Body for Scientific and Technological Advice, the Conference of the Parties serving as the meeting of the Parties to this Protocol shall regularly review and, as appropriate, revise the global warming potential of each such greenhouse gas, taking fully into account any relevant decisions by the Conference of the Parties. Any revision to a global warming potential shall apply only to commitments under Article 3 in respect of any commitment period adopted subsequent to that revision.

Article 6

1. For the purpose of meeting its commitments under Article 3, any Party included in Annex I may transfer to, or acquire from, any other such Party emission reduction units resulting from projects aimed at reducing anthropogenic emissions by sources or enhancing anthropogenic removals by sinks of greenhouse gases in any sector of the economy, provided that:
 - (a) Any such project has the approval of the Parties involved;
 - (b) Any such project provides a reduction in emissions by sources, or an enhancement of removals by sinks, that is additional to any that would otherwise occur;
 - (c) It does not acquire any emission reduction units if it is not in compliance with its obligations under Articles 5 and 7; and
 - (d) The acquisition of emission reduction units shall be supplemental to domestic actions for the purposes of meeting commitments under Article 3.
2. The Conference of the Parties serving as the meeting of the Parties to this Protocol may, at its first session or as soon as practicable thereafter, further elaborate guidelines for the implementation of this Article, including for verification and reporting.
3. A Party included in Annex I may authorize legal entities to participate, under its responsibility, in actions leading to the generation, transfer or acquisition under this Article of emission reduction units.
4. If a question of implementation by a Party included in Annex I of the requirements referred to in this Article is identified in accordance with the relevant provisions of Article 8, transfers and acquisitions of emission reduction units may continue to be made after the question has been identified, provided that any such units may not be used by a Party to meet its commitments under Article 3 until any issue of compliance is resolved.

Article 7

1. Each Party included in Annex I shall incorporate in its annual inventory of anthropogenic emissions by sources and removals by sinks of greenhouse gases not controlled by the Montreal Protocol, submitted in accordance with the relevant decisions of the Conference of the Parties, the necessary supplementary information for the purposes of ensuring compliance with Article 3, to be determined in accordance with paragraph 4 below.
2. Each Party included in Annex I shall incorporate in its national communication, submitted under Article 12 of the Convention, the supplementary information necessary to demonstrate compliance with its commitments under this Protocol, to be determined in accordance with paragraph 4 below.
3. Each Party included in Annex I shall submit the information required under paragraph 1 above annually, beginning with the first inventory due under the Convention for the first year of the commitment period after this Protocol has entered into force for that Party. Each such Party shall submit the information required under paragraph 2 above as part of the first national communication due under the Convention after this Protocol has entered into force for it and after the adoption of guidelines as provided for in paragraph 4 below. The frequency of subsequent submission of information required under this Article shall be determined by the Conference of the Parties serving as the meeting of the Parties to this Protocol, taking into account any timetable for the submission of national communications decided upon by the Conference of the Parties.
4. The Conference of the Parties serving as the meeting of the Parties to this Protocol shall adopt at its first session, and review periodically thereafter, guidelines for the preparation of the information required under this Article, taking into account guidelines for the preparation of national communications by Parties included in Annex I adopted by the Conference of the Parties. The Conference of the Parties serving as the meeting of the Parties to this Protocol shall also, prior to the first commitment period, decide upon modalities for the accounting of assigned amounts.

Article 8

1. The information submitted under Article 7 by each Party included in Annex I shall be reviewed by expert review teams pursuant to the relevant decisions of the Conference of the Parties and in accordance with guidelines adopted for this purpose by the Conference of the Parties serving as the meeting of the Parties to this Protocol under paragraph 4 below. The information submitted under Article 7, paragraph 1, by each Party included in Annex I shall be reviewed as part of the annual compilation and accounting of emissions inventories and assigned amounts. Article 10

All Parties, taking into account their common but differentiated responsibilities and their specific national and regional development priorities, objectives and circumstances, without introducing any new commitments for Parties not included in Annex I, but reaffirming existing commitments under Article 4, paragraph 1, of the Convention, and continuing to advance the implementation of these commitments in order to achieve sustainable development, taking into account Article 4, paragraphs 3, 5 and 7, of the Convention, shall:

- (a) Formulate, where relevant and to the extent possible, cost-effective national and, where appropriate, regional programmes to improve the quality of local emission factors, activity data and/or models which reflect the socio-economic conditions of each Party for the preparation and periodic updating of national inventories of anthropogenic emissions by sources and removals by sinks of all greenhouse gases not controlled by the Montreal Protocol, using comparable methodologies to be agreed upon by the Conference of the Parties, and consistent with the guidelines for the preparation of national communications adopted by the Conference of the Parties;
- (b) Formulate, implement, publish and regularly update national and, where appropriate, regional programmes containing measures to mitigate climate change and measures to facilitate adequate adaptation to climate change:
 - (i) Such programmes would, *inter alia*, concern the energy, transport and industry sectors as well as agriculture, forestry and waste management. Furthermore, adaptation technologies and methods for improving spatial planning would improve adaptation to climate change; and
 - (ii) Parties included in Annex I shall submit information on action under this Protocol, including national programmes, in accordance with Article 7; and other Parties shall seek to include in their national communications, as appropriate, information on programmes which contain measures that the Party believes contribute to addressing climate change and its adverse impacts, including the abatement of increases in greenhouse gas emissions, and enhancement of and removals by sinks, capacity building and adaptation measures;
- (c) Cooperate in the promotion of effective modalities for the development, application and diffusion of, and take all practicable steps to promote, facilitate and finance, as appropriate, the transfer of, or access to, environmentally sound technologies, know-how, practices and processes pertinent to climate change, in particular to developing countries, including the formulation of policies and programmes for the effective transfer of environmentally sound technologies

that are publicly owned or in the public domain and the creation of an enabling environment for the private sector, to promote and enhance the transfer of, and access to, environmentally sound technologies;

- (d) Cooperate in scientific and technical research and promote the maintenance and the development of systematic observation systems and development of data archives to reduce uncertainties related to the climate system, the adverse impacts of climate change and the economic and social consequences of various response strategies, and promote the development and strengthening of endogenous capacities and capabilities to participate in international and inter-governmental efforts, programmes and networks on research and systematic observation, taking into account Article 5 of the Convention;
- (e) Cooperate in and promote at the international level, and, where appropriate, using existing bodies, the development and implementation of education and training programmes, including the strengthening of national capacity building, in particular human and institutional capacities and the exchange or secondment of personnel to train experts in this field, in particular for developing countries, and facilitate at the national level public awareness of, and public access to information on, climate change. Suitable modalities should be developed to implement these activities through the relevant bodies of the Convention, taking into account Article 6 of the Convention;
- (f) Include in their national communications information on programmes and activities undertaken pursuant to this Article in accordance with relevant decisions of the Conference of the Parties; and
- (g) Give full consideration, in implementing the commitments under this Article, to Article 4, paragraph 8, of the Convention.

Article 11

1. In the implementation of Article 10, Parties shall take into account the provisions of Article 4, paragraphs 4, 5, 7, 8 and 9, of the Convention.
2. In the context of the implementation of Article 4, paragraph 1, of the Convention, in accordance with the provisions of Article 4, paragraph 3, and Article 11 of the Convention, and through the entity or entities entrusted with the operation of the financial mechanism of the Convention, the developed country Parties and other developed Parties included in Annex II to the Convention shall:
 - (a) Provide new and additional financial resources to meet the agreed full costs incurred by developing country Parties in advancing the implementation of existing commitments under Article 4, paragraph 1(a), of the Convention that are covered in Article 10, subparagraph (a); and
 - (b) Also provide such financial resources, including for the transfer of technology, needed by the developing country Parties to meet the agreed full incremental costs of advancing the implementation of existing commitments under Article 4, paragraph 1, of the Convention that are covered

by Article 10 and that are agreed between a developing country Party and the international entity or entities referred to in Article 11 of the Convention, in accordance with that Article.

The implementation of these existing commitments shall take into account the need for adequacy and predictability in the flow of funds and the importance of appropriate burden sharing among developed country Parties. The guidance to the entity or entities entrusted with the operation of the financial mechanism of the Convention in relevant decisions of the Conference of the Parties, including those agreed before the adoption of this Protocol, shall apply *mutatis mutandis* to the provisions of this paragraph.

3. The developed country Parties and other developed Parties in Annex II to the Convention may also provide, and developing country Parties avail themselves of, financial resources for the implementation of Article 10, through bilateral, regional and other multilateral channels.

Article 12

1. A clean development mechanism is hereby defined.
2. The purpose of the clean development mechanism shall be to assist Parties not included in Annex I in achieving sustainable development and in contributing to the ultimate objective of the Convention, and to assist Parties included in Annex I in achieving compliance with their quantified emission limitation and reduction commitments under Article 3.
3. Under the clean development mechanism:
 - (a) Parties not included in Annex I will benefit from project activities resulting in certified emission reductions; and
 - (b) Parties included in Annex I may use the certified emission reductions accruing from such project activities to contribute to compliance with part of their quantified emission limitation and reduction commitments under Article 3, as determined by the Conference of the Parties serving as the meeting of the Parties to this Protocol.
4. The clean development mechanism shall be subject to the authority and guidance of the Conference of the Parties serving as the meeting of the Parties to this Protocol and be supervised by an executive board of the clean development mechanism.
5. Emission reductions resulting from each project activity shall be certified by operational entities to be designated by the Conference of the Parties serving as the meeting of the Parties to this Protocol, on the basis of:
 - (a) Voluntary participation approved by each Party involved;
 - (b) Real, measurable, and long-term benefits related to the mitigation of climate change; and

- (c) Reductions in emissions that are additional to any that would occur in the absence of the certified project activity.
- 6. The clean development mechanism shall assist in arranging funding of certified project activities as necessary.
- 7. The Conference of the Parties serving as the meeting of the Parties to this Protocol shall, at its first session, elaborate modalities and procedures with the objective of ensuring transparency, efficiency and accountability through independent auditing and verification of project activities.
- 8. The Conference of the Parties serving as the meeting of the Parties to this Protocol shall ensure that a share of the proceeds from certified project activities is used to cover administrative expenses as well as to assist developing country Parties that are particularly vulnerable to the adverse effects of climate change to meet the costs of adaptation.
- 9. Participation under the clean development mechanism, including in activities mentioned in paragraph 3(a) above and in the acquisition of certified emission reductions, may involve private and/or public entities, and is to be subject to whatever guidance may be provided by the executive board of the clean development mechanism.
- 10. Certified emission reductions obtained during the period from the year 2000 up to the beginning of the first commitment period can be used to assist in achieving compliance in the first commitment period.
